

Answer Key

Grammar

Defining relative clauses (that, which, who)

We use defining relative clauses to give essential information that identifies exactly who or what we are talking about. Use 'who' for people, 'which' for things, and 'that' for both people and things. No comma is used before the clause.

Tanımlayıcı ilgi cümlecikleri, kimden veya neden bahsettiğimizi tam olarak belirten gerekli bilgiyi verir. İnsanlar için 'who', nesneler için 'which', hem insanlar hem nesneler için 'that' kullanılır. Cümlecikten önce virgöl kullanılmaz.

When? Use a defining relative clause when the information in the clause is necessary to understand which person or thing you mean.

Cümlecikteki bilgi, hangi kişi veya nesneden bahsettiğimizi anlamak için gerekliyse tanımlayıcı ilgi cümlecği kullanılır.

Positive

- The resource that/which we use most is water.
- People who protect nature are important.

Negative

- This isn't the kind of pollution that we can ignore.
- There aren't many rivers which are still clean.

Question

- Is this the forest that was damaged by the fire?
- Who is the person who started this project?

Short answers

- Not applicable in short-answer form; the clause is part of a longer sentence.

Common mistakes

- ~~The man which works in recycling is my neighbour.~~ → **The man who works in recycling is my neighbour.**
- ~~Solar power, that is renewable, is getting cheaper.~~ → **Solar power, which is renewable, is getting cheaper.**

1. Coal is a fuel _____ comes from underground. **(that / which)**

For things, use 'that' or 'which'.

2. The volunteers _____ cleaned the beach worked all day. **(who / that)**

For people, use 'who' or 'that'.

3. Choose the correct word: 'The scientist _____ discovered the problem published a report.'

- a. which
- b. who ✓
- c. what
- d. whose

'Who' is used for people.

4. The river which flows near our town is very clean. — True / False **(Correct)**

AbOnlinEnglish Upper Secondary — 10. Sınıf — Answer Key · Orijinal içerik, TYMM müfredatıyla uyumlu.

5. The man which works at the recycling plant is helpful. — True / False **(Incorrect — The man who works at the recycling plant is helpful.)**

6. Combine: 'Wind is a resource. It never runs out.' (Use a relative clause.) **Wind is a resource that/which never runs out.**

7. Put the words in order: is / clean / a / that / fuel / hydrogen
Hydrogen is a fuel that is clean.

8. Combine: 'Farmers grow our food. They need clean water.' (Use 'who' and combine the two ideas into one sentence.) **Farmers who grow our food need clean water.**

9. The company _____ builds wind turbines is expanding fast. **(that / which)**

For a thing (a company), 'that' or 'which' is correct.

Connecting words: so (cause and effect)

We use 'so' to connect a cause (the reason) with its effect (the result). The cause comes first, followed by a comma, then 'so' and the effect.

'So' bir nedeni (sebebi) sonucuyla (etkisiyle) bağlamak için kullanılır. Önce neden gelir, sonra virgül, sonra 'so' ve etki gelir.

When? Use 'so' when you want to show that one event or situation directly causes another.

Bir olayın veya durumun doğrudan başka bir olaya neden olduğunu göstermek istediğinizde 'so' kullanılır.

Positive

- The river was polluted, so the government closed the beach.
- We saved water, so our bills were lower.

Negative

- We didn't recycle enough, so waste kept increasing.
- They didn't protect the forest, so animals lost their habitat.

Question

- Not typically used to form questions; 'so' links two statements.
- Why did they build solar farms, so that they could reduce emissions? (less common form)

Short answers

- Not applicable; 'so' joins two clauses rather than giving a short answer.

Common mistakes

- ~~The air was dirty, because people stopped going outside.~~ → **The air was dirty, so people stopped going outside.**
- ~~It was raining so we brought umbrellas so we didn't get wet.~~ → **It was raining, so we brought umbrellas.**

1. The factory closed, _____ pollution in the area dropped. **(so)**

'So' introduces the effect (pollution dropped).

2. Choose the correct connector: 'The drought lasted six months, _____ the crops failed.'

- AbOnlinEnglish Upper Secondary — 10. Sınıf — Answer Key · Orijinal içerik, TYMM müfredatıyla uyumlu.
- a. because
 - b. so ✓
 - c. although
 - d. but

'So' links the cause (drought) to the effect (crops failed).

3. We recycled more paper, so fewer trees were cut down. — True / False **(Correct)**

4. So the ice melted, sea levels rose. — True / False **(Incorrect — The ice melted, so sea levels rose.)**

5. Combine using 'so': 'The lake dried up. Farmers could not grow crops.' (Cause first, then 'so'.) **The lake dried up, so farmers could not grow crops.**

6. Put the words in order: cleaner, is, so, less, we, waste, the, city, recycle,
We recycle less waste, so the city is cleaner.

7. Combine: 'The company used too much water. The river shortage got worse.' (Use 'so' to link the two ideas.)
The company used too much water, so the river shortage got worse.

8. Governments invested in wind turbines, _____ renewable energy use increased. **(so)**

'So' shows the investment caused the increase.

The World's Water Problem

Before you read

- Look at the title. What do you think the text will be about?
- How much water do you think a family uses in one day?

Water is one of the most important natural resources on Earth, but it is not endless. Although almost seventy percent of the planet is covered with water, only a small part of it is fresh water that people, animals, and plants can use. Most fresh water is locked in ice or deep underground, so the amount that is easily available is actually quite limited.

In many parts of the world, people are already facing serious water shortages. Long periods of drought, growing populations, and wasteful habits are putting pressure on rivers and lakes that used to provide plenty of clean water. In some regions, farmers cannot grow enough food because there simply isn't enough water for their fields, so families are forced to move to cities to find other work.

Factories and farms are also responsible for a lot of water pollution. Chemicals and waste that are dumped into rivers make the water unsafe for drinking, swimming, or fishing. This pollution harms the ecosystems that depend on clean water, and it can take many years for a damaged river to recover.

Fortunately, there are simple actions that can help. Fixing leaking pipes, taking shorter showers, and collecting rainwater are habits that reduce water waste at home. On a larger scale, governments and companies that invest in better water treatment and recycling systems can protect this resource for future generations. Every person who saves water, even a small amount, makes a difference.

1. What percentage of the Earth's surface is covered with water?

- a. About 30%
- b. About 50%
- c. About 70% ✓
- d. About 90%

The text says almost seventy percent of the planet is covered with water.

2. According to the text, most of the Earth's water is easy for people to use. — True / False **(Incorrect — Most fresh water is locked in ice or underground, so only a small part is easily available.)**

3. Why do some farmers move to cities, according to the text?

- a. They prefer city life.
- b. There isn't enough water for their fields. ✓
- c. Cities have better schools.
- d. Farming is no longer legal.

The text explains that a lack of water forces some families to move to cities to find other work.

4. Chemicals and waste dumped into rivers make the water unsafe for drinking, swimming, _____ fishing. **(or)**

The list of three activities is joined with 'or'.

5. Which of these is NOT mentioned as a way to reduce water waste at home?

- AbOnlinEnglish Upper Secondary — 10. Sınıf — Answer Key · Orijinal içerik, TYMM müfredatıyla uyumlu.
- a. Fixing leaking pipes
 - b. Taking shorter showers
 - c. Collecting rainwater
 - d. Buying bottled water ✓

Buying bottled water is not mentioned; the other three are given as home habits.

6. Rewrite this sentence using a relative clause: 'Governments invest in water treatment systems. These systems can protect this resource.' (Use 'that' or 'which'.) **Governments invest in water treatment systems that/which can protect this resource.**

After you read

- What is one habit from the text that you could start doing at home?
- Do you think water shortages will become a bigger problem in the future? Why?

Saving the Rainforest

Before you read

- What do you already know about rainforests?
- Why do you think rainforests are important for the whole planet?

Rainforests, which cover only a small part of the Earth's land, are home to more than half of the world's plant and animal species. They also produce a large amount of the oxygen we breathe and absorb huge amounts of carbon dioxide, so they play a key role in controlling the planet's climate.

Despite their importance, rainforests are disappearing quickly. Every year, large areas of forest are cut down for wood, farmland, and mining. This process, which is called deforestation, destroys the habitats of countless animals and forces some species closer to extinction. When trees that store carbon are burned or removed, that carbon is released into the atmosphere, so deforestation also makes climate change worse.

People who live near rainforests often depend on them for food, medicine, and their way of life. When the forest disappears, these communities lose resources that they have used for generations. This shows that protecting rainforests is not only about saving animals and plants, but also about supporting the people who call these forests home.

There are hopeful signs, though. Organisations that plant new trees, governments that create protected forest areas, and companies that choose sustainable wood are all part of the solution. Consumers who check where their products come from can also help by choosing goods that do not contribute to deforestation. Small choices, repeated by millions of people, can add up to a big difference.

1. According to the text, what percentage of the world's plant and animal species live in rainforests?

- a. Less than 10%
- b. About 25%
- c. More than half ✓
- d. Exactly 100%

The text says rainforests are home to more than half of the world's species.

2. Deforestation has no effect on climate change. — True / False **(Incorrect — Deforestation makes climate change worse because it releases stored carbon into the atmosphere.)**

3. Why do some local communities lose important resources when the forest disappears?

AbOnlinEnglish Upper Secondary — 10. Sınıf — Answer Key · Orijinal içerik, TYMM müfredatıyla uyumlu.

- a. They move to other forests.
- b. They depend on the forest for food, medicine, and their way of life. ✓
- c. They no longer need natural resources.
- d. The government gives them new land.

The text states these communities depend on the forest for food, medicine, and their way of life.

4. Every year, large areas of forest are cut down for wood, farmland, _____ mining. (and)

The list of three reasons is joined with 'and'.

5. Which group is NOT mentioned as part of the solution?

- a. Organisations that plant trees
- b. Governments that create protected areas
- c. Companies that choose sustainable wood
- d. Airlines that offer cheaper flights ✓

Airlines are not mentioned; the other three groups are given as part of the solution.

6. Combine using 'so': 'Trees store carbon. Burning trees releases that carbon into the air.' (Cause first, then 'so'.) **Trees store carbon, so burning trees releases that carbon into the air.**

After you read

- Which solution from the text do you think is the most effective? Why?
- What could you personally do to help protect rainforests?

A School Project on Natural Resources

Before you listen

- What natural resources do you think your school uses every day?
- Have you ever done a project about the environment? What was it about?

1. What is the class project about?

- a. A history project
- b. A natural resource in their region ✓
- c. A sports event
- d. A cooking competition

The teacher asks students to choose a natural resource important in their region.

2. Ayşe chose to research forests. — True / False (**Incorrect — Ayşe chose to research water; Emre chose forests.**)

3. Why did Ayşe's town have problems last summer?

- a. A flood
- b. A water shortage ✓
- c. A forest fire
- d. A power cut

Ayşe says her town had a water shortage last summer.

4. Emre wants to visit the damaged forest area and take photos, _____ people can really see the problem. (**so**)

'So' introduces the purpose/effect of taking photos.

5. What must each project include, according to the teacher?

- a. A video
- b. At least three ways to protect the resource ✓
- c. A poem
- d. An interview with a scientist

The teacher says to include at least three ways to protect the chosen resource.

Transcript (teacher use)

Teacher Okay everyone, for this term's project, I want you to choose a natural resource that is important in our region and explain how we can protect it.

Ayşe I'd like to research water, because our town had a shortage last summer, so people had to limit how much they used.

Teacher That's a great choice. Who else has an idea?

Emre I want to look at forests. There's a forest near my village that is losing trees every year because of illegal cutting.

Teacher Interesting. Remember, your project should explain the problem and suggest realistic solutions that people can actually use.

Abdülilim English Upper Secondary — 10. Sınıf — Answer Key · Orijinal içerik, TYMM müfredatıyla uyumlu.

Ayşe For water, I'm thinking about interviewing farmers who use irrigation, and asking them what changes they've made.

Emre For forests, I want to visit the area that was damaged and take photos, so people can really see the problem.

Teacher Both sound excellent. Don't forget to include at least three ways to protect the resource you choose, and present your project next Friday.

Talking About Renewable Energy

Before you listen

- What forms of renewable energy do you know?
- Do you think your city uses much renewable energy?

1. What has been installed on the community centre roof?

- a. Wind turbines
- b. Solar panels ✓
- c. A water tank
- d. A garden

Speaker B mentions solar panels on the roof.

2. Everyone agrees that wind turbines have no disadvantages. — True / False (**Incorrect — Speaker B says wind turbines built near towns can make noise, which some people don't like.**)

3. According to Speaker B, which energy source works well for people far from the coast?

- a. Wind power
- b. Solar power ✓
- c. Coal power
- d. Water power

Speaker B says solar power works better for people who get less wind.

4. The solar panels produce enough electricity for the whole building, _____ the centre doesn't need to buy much power anymore. (**so**)

'So' links the cause (enough electricity) to the effect (not needing to buy power).

Transcript (teacher use)

A Have you seen the new solar panels on the community centre roof?

B Yes! I read that they produce enough electricity for the whole building, so the centre doesn't need to buy much power anymore.

A That's amazing. I think wind turbines are also a good option for our region, because it's often windy here.

B True, although wind turbines that are built near towns sometimes make noise, which some people don't like.

A That's a fair point. What about people who live far from the coast, where there's less wind?

B Good question. I guess solar power works better for them, since most places get enough sunlight.

A I read an article that said renewable energy could provide most of our electricity within twenty years.

AbOnlinEnglish Upper Secondary — 10. Sınıf — Answer Key · Orijinal içerik, TYMM müfredatıyla uyumlu.

B I hope so. The sooner we reduce our use of fossil fuels, the better it will be for the planet.

1. Which word means 'a fuel that will eventually run out'?

- a. renewable
- b. non-renewable ✓
- c. sustainable
- d. recyclable

Non-renewable resources cannot be replaced once used up.

2. The scientist _____ discovered the problem works at our university. (who / that)

For a person, use 'who' or 'that'.

3. The rainforest produces a lot of oxygen, _____ it is important for the whole planet.

- a. because
- b. so ✓
- c. although
- d. but

'So' shows the effect (importance) of producing oxygen.

4. According to reading passage 1, most of the Earth's water is easy for people to use. — True / False
(Incorrect — Most fresh water is locked in ice or underground, so it is not easily available.)

5. In listening 2, what did Speaker B say about wind turbines near towns?

- a. They are silent.
- b. They can make noise. ✓
- c. They are always broken.
- d. They are illegal.

Speaker B mentions that wind turbines near towns can make noise.

6. Combine: 'Deforestation destroys habitats. Many animals lose their homes.' (Use 'so'.) **Deforestation destroys habitats, so many animals lose their homes.**

7. Water is a resource _____ every living thing needs. (that / which)

For a thing, use 'that' or 'which'.

8. Which is an example of a renewable energy source?

- a. Coal
- b. Oil
- c. Solar power ✓
- d. Natural gas

Solar power comes from the sun and never runs out.

9. Put the words in order: so, we, energy, panels, installed, save, solar,
We installed solar panels so we save energy.

10. What does the word 'endangered' describe?

AbOnlinEnglish Upper Secondary — 10. Sınıf — Answer Key · Orijinal içerik, TYMM müfredatıyla uyumlu.

- ☐ a. A very common animal
- ☒ b. An animal at risk of disappearing ✓
- ☐ c. A pet animal
- ☐ d. A newly discovered animal

Endangered species are at risk of becoming extinct.

1. Which word means 'the destruction of forests'?

- a. pollution
- b. deforestation ✓
- c. conservation
- d. consumption

Deforestation refers to cutting down forests.

2. Turning off lights when you leave a room helps _____ energy. **(conserve / save)**

'Conserve' means to use less of something to avoid waste.

3. 'Emission' most closely means...

- a. a type of resource
- b. gas released into the air ✓
- c. a kind of forest
- d. a form of water

Emissions are gases released, often from vehicles or factories.

4. 'Sustainable' means something that can continue without running out. — True / False **(Correct)**

1. The company _____ builds wind turbines is growing fast. **(that / which)**

For a thing (a company), use 'that' or 'which'.

2. Choose the correct sentence.

- a. The man which planted the trees is my father.
- b. The man who planted the trees is my father. ✓
- c. The man whom planted the trees is my father.
- d. The man which is planted the trees is my father.

'Who' is correct for people.

3. Combine: 'It didn't rain for months. The crops died.' (Use 'so'.) **It didn't rain for months, so the crops died.**

4. 'So the lake dried up, farmers lost their crops.' is a correctly formed sentence. — True / False **(Incorrect — The lake dried up, so farmers lost their crops.)**

1. Based on reading 1, what causes water pollution?

- a. Rain
- b. Chemicals and waste from factories and farms ✓
- c. Wind
- d. Sunlight

The text says chemicals and waste dumped into rivers cause pollution.

2. Based on reading 2, deforestation has no impact on climate change. — True / False **(Incorrect — Deforestation releases stored carbon and makes climate change worse.)**

1. In listening 1, which resource did Emre choose to research?

- ☐ a. Water
- ☒ b. Forests ✓
- ☐ c. Soil
- ☐ d. Air

Emre says he wants to look at forests near his village.

2. In listening 2, solar panels produce enough electricity for the building, _____ it doesn't need to buy much power. (so)

'So' links the cause to the result.
