

Complete Theme

Vocabulary — 24 words

Word	IPA	Turkish	Example
natural resource <i>noun</i>	/ˈnætʃrəl rɪˈsɔːs/	doğal kaynak	Water is a natural resource that every living thing needs.
renewable <i>adj</i>	/rɪˈnjuːəbl/	yenilenebilir	Solar power is a renewable source of energy.
non-renewable <i>adj</i>	/ˌnɒn rɪˈnjuːəbl/	yenilenemez	Coal is a non-renewable resource, so it will run out one day.
fossil fuel <i>noun</i>	/ˈfɒsl fjuːəl/	fosil yakıt	Burning fossil fuels releases a lot of carbon dioxide into the air.
pollution <i>noun</i>	/pəˈluːʃn/	kirlilik	Air pollution in big cities can harm people's health.
deforestation <i>noun</i>	/diːˌfɒrɪˈsteɪʃn/	ormansızlaşma	Deforestation destroys the homes of many animals.
endangered <i>adj</i>	/ɪnˈdeɪndʒəd/	nesli tükenmekte olan	The tiger is an endangered species because of hunting.
climate change <i>noun</i>	/ˈklaɪmət tʃeɪndʒ/	iklim değişikliği	Climate change is causing more extreme weather around the world.
global warming <i>noun</i>	/ˌɡləʊbl ˈwɔːmɪŋ/	küresel ısınma	Global warming is making the ice at the poles melt faster.
drought <i>noun</i>	/draʊt/	kuraklık	The drought lasted for months, so many farms lost their crops.
recycle <i>verb</i>	/ˌriːˈsaɪkl/	geri dönüştürmek	We recycle paper and plastic at our school every week.
waste <i>noun</i>	/weɪst/	atık	Households produce a lot of waste that goes to landfill.
sustainable <i>adj</i>	/səˈsteɪnəbl/	sürdürülebilir	The city is trying to build a more sustainable transport system.
conserve <i>verb</i>	/kənˈsɜːv/	korumak, tasarruf etmek	We should conserve water, especially in summer.
ecosystem <i>noun</i>	/ˈiːkəʊsɪstəm/	ekosistem	A forest fire can destroy an entire ecosystem in a few days.
habitat <i>noun</i>	/ˈhæbɪtæt/	yaşam alanı	Many animals are losing their natural habitat because of building projects.

Word	IPA	Turkish	Example
AbOnlinEnglish Upper Secondary — 10. Sınıf — Complete Theme : Orijinal içerik, TYMM müfredatıyla uyumlu.			
greenhouse gas <i>noun</i>	/ˈɡriːnhaʊs ɡæs/	sera gazı	Cars and factories release greenhouse gases into the atmosphere.
solar panel <i>noun</i>	/ˈsəʊlə pænl/	güneş paneli	Our school installed solar panels on the roof last year.
wind turbine <i>noun</i>	/wɪnd ˈtɜːbaɪn/	rüzgar türbini	The wind turbines on the hill produce clean electricity.
extinct <i>adj</i>	/ɪkˈstɪŋkt/	nesli tükenmiş	Some sea animals could become extinct if the oceans keep warming.
shortage <i>noun</i>	/ˈʃɔːtɪdʒ/	kıtlık	Many regions are facing a serious water shortage this year.
environment <i>noun</i>	/ɪnˈvaɪrənmənt/	çevre	We must protect the environment for future generations.
consumption <i>noun</i>	/kənˈsʌmpʃn/	tüketim	Turning off lights can reduce electricity consumption at home.
emission <i>noun</i>	/ɪˈmɪʃn/	salım, emisyon	Factories must lower their carbon emissions to help the planet.

Defining relative clauses (that, which, who)

We use defining relative clauses to give essential information that identifies exactly who or what we are talking about. Use 'who' for people, 'which' for things, and 'that' for both people and things. No comma is used before the clause.

Tanımlayıcı ilgi cümlecikleri, kimden veya neden bahsettiğimizi tam olarak belirten gerekli bilgiyi verir. İnsanlar için 'who', nesneler için 'which', hem insanlar hem nesneler için 'that' kullanılır. Cümlecikten önce virgöl kullanılmaz.

When? Use a defining relative clause when the information in the clause is necessary to understand which person or thing you mean.

Cümlecikteki bilgi, hangi kişi veya nesneden bahsettiğimizi anlamak için gerekliyse tanımlayıcı ilgi cümlecigi kullanılır.

Positive

- The resource that/which we use most is water.
- People who protect nature are important.

Negative

- This isn't the kind of pollution that we can ignore.
- There aren't many rivers which are still clean.

Question

- Is this the forest that was damaged by the fire?
- Who is the person who started this project?

Short answers

- Not applicable in short-answer form; the clause is part of a longer sentence.

Common mistakes

- ~~The man which works in recycling is my neighbour.~~ → **The man who works in recycling is my neighbour.**
- ~~Solar power, that is renewable, is getting cheaper.~~ → **Solar power, which is renewable, is getting cheaper.**

1. Coal is a fuel _____ comes from underground.
2. The volunteers _____ cleaned the beach worked all day.
3. Choose the correct word: 'The scientist _____ discovered the problem published a report.'
 - a. which
 - b. who
 - c. what
 - d. whose
4. The river which flows near our town is very clean. — *True / False*
5. The man which works at the recycling plant is helpful. — *True / False*
6. Combine: 'Wind is a resource. It never runs out.' (*Use a relative clause.*)
7. Put the words in order: is / clean / a / that / fuel / hydrogen

8. Combine: 'Farmers grow our food. They need clean water.' (Use 'who' and combine the two ideas into one sentence.) AbOnlinEnglish Upper Secondary — 10. Sınıf — Complete Theme · Orijinal içerik, TYMM müfredatıyla uyumlu.

9. The company _____ builds wind turbines is expanding fast.

Connecting words: so (cause and effect)

We use 'so' to connect a cause (the reason) with its effect (the result). The cause comes first, followed by a comma, then 'so' and the effect.

'So' bir nedeni (sebebi) sonucuyla (etkisiyle) bağlamak için kullanılır. Önce neden gelir, sonra virgöl, sonra 'so' ve etki gelir.

When? Use 'so' when you want to show that one event or situation directly causes another.

Bir olayın veya durumun doğrudan başka bir olaya neden olduğunu göstermek istediğinizde 'so' kullanılır.

Positive

- The river was polluted, so the government closed the beach.
- We saved water, so our bills were lower.

Negative

- We didn't recycle enough, so waste kept increasing.
- They didn't protect the forest, so animals lost their habitat.

Question

- Not typically used to form questions; 'so' links two statements.
- Why did they build solar farms, so that they could reduce emissions? (less common form)

Short answers

- Not applicable; 'so' joins two clauses rather than giving a short answer.

Common mistakes

- ~~The air was dirty, because people stopped going outside.~~ → **The air was dirty, so people stopped going outside.**
- ~~It was raining so we brought umbrellas so we didn't get wet.~~ → **It was raining, so we brought umbrellas.**

1. The factory closed, _____ pollution in the area dropped.

2. Choose the correct connector: 'The drought lasted six months, _____ the crops failed.'

- a. because
- b. so
- c. although
- d. but

3. We recycled more paper, so fewer trees were cut down. — True / False

4. So the ice melted, sea levels rose. — True / False

5. Combine using 'so': 'The lake dried up. Farmers could not grow crops.' (Cause first, then 'so'.)

6. Put the words in order: cleaner, is, so, less, we, waste, the, city, recycle,

7. Combine: 'The company used too much water. The river shortage got worse.' (Use 'so' to link the two ideas.)

8. Governments invested in wind turbines, _____ renewable energy use increased.

The World's Water Problem

Before you read

- Look at the title. What do you think the text will be about?
- How much water do you think a family uses in one day?

Water is one of the most important natural resources on Earth, but it is not endless. Although almost seventy percent of the planet is covered with water, only a small part of it is fresh water that people, animals, and plants can use. Most fresh water is locked in ice or deep underground, so the amount that is easily available is actually quite limited.

In many parts of the world, people are already facing serious water shortages. Long periods of drought, growing populations, and wasteful habits are putting pressure on rivers and lakes that used to provide plenty of clean water. In some regions, farmers cannot grow enough food because there simply isn't enough water for their fields, so families are forced to move to cities to find other work.

Factories and farms are also responsible for a lot of water pollution. Chemicals and waste that are dumped into rivers make the water unsafe for drinking, swimming, or fishing. This pollution harms the ecosystems that depend on clean water, and it can take many years for a damaged river to recover.

Fortunately, there are simple actions that can help. Fixing leaking pipes, taking shorter showers, and collecting rainwater are habits that reduce water waste at home. On a larger scale, governments and companies that invest in better water treatment and recycling systems can protect this resource for future generations. Every person who saves water, even a small amount, makes a difference.

1. What percentage of the Earth's surface is covered with water?
 - a. About 30%
 - b. About 50%
 - c. About 70%
 - d. About 90%
2. According to the text, most of the Earth's water is easy for people to use. — *True / False*
3. Why do some farmers move to cities, according to the text?
 - a. They prefer city life.
 - b. There isn't enough water for their fields.
 - c. Cities have better schools.
 - d. Farming is no longer legal.
4. Chemicals and waste dumped into rivers make the water unsafe for drinking, swimming, _____ fishing.
5. Which of these is NOT mentioned as a way to reduce water waste at home?
 - a. Fixing leaking pipes
 - b. Taking shorter showers
 - c. Collecting rainwater
 - d. Buying bottled water

6. Rewrite this sentence using a relative clause: 'Governments invest in water treatment systems. These systems can protect this resource.' (Use *that* or *which*.)

Ab Online English Lesson Secondary - 120 - Bunif - Complete Theme - Orijinal içerik, TYMM müfredatıyla uyumlu.

After you read

- What is one habit from the text that you could start doing at home?
- Do you think water shortages will become a bigger problem in the future? Why?

Saving the Rainforest

Before you read

- What do you already know about rainforests?
- Why do you think rainforests are important for the whole planet?

Rainforests, which cover only a small part of the Earth's land, are home to more than half of the world's plant and animal species. They also produce a large amount of the oxygen we breathe and absorb huge amounts of carbon dioxide, so they play a key role in controlling the planet's climate.

Despite their importance, rainforests are disappearing quickly. Every year, large areas of forest are cut down for wood, farmland, and mining. This process, which is called deforestation, destroys the habitats of countless animals and forces some species closer to extinction. When trees that store carbon are burned or removed, that carbon is released into the atmosphere, so deforestation also makes climate change worse.

People who live near rainforests often depend on them for food, medicine, and their way of life. When the forest disappears, these communities lose resources that they have used for generations. This shows that protecting rainforests is not only about saving animals and plants, but also about supporting the people who call these forests home.

There are hopeful signs, though. Organisations that plant new trees, governments that create protected forest areas, and companies that choose sustainable wood are all part of the solution. Consumers who check where their products come from can also help by choosing goods that do not contribute to deforestation. Small choices, repeated by millions of people, can add up to a big difference.

1. According to the text, what percentage of the world's plant and animal species live in rainforests?

- a. Less than 10%
- b. About 25%
- c. More than half
- d. Exactly 100%

2. Deforestation has no effect on climate change. — *True / False*

3. Why do some local communities lose important resources when the forest disappears?

- a. They move to other forests.
- b. They depend on the forest for food, medicine, and their way of life.
- c. They no longer need natural resources.
- d. The government gives them new land.

4. Every year, large areas of forest are cut down for wood, farmland, _____ mining.

5. Which group is NOT mentioned as part of the solution?

AbOnlineEnglish Upper Secondary — 10. Sınıf — Complete Theme · Orijinal içerik, TYMM müfredatıyla uyumlu.

- a. Organisations that plant trees
- b. Governments that create protected areas
- c. Companies that choose sustainable wood
- d. Airlines that offer cheaper flights

6. Combine using 'so': 'Trees store carbon. Burning trees releases that carbon into the air.' (*Cause first, then 'so'.*)

After you read

- Which solution from the text do you think is the most effective? Why?
- What could you personally do to help protect rainforests?

A School Project on Natural Resources

Before you listen

- What natural resources do you think your school uses every day?
- Have you ever done a project about the environment? What was it about?

1. What is the class project about?

- a. A history project
- b. A natural resource in their region
- c. A sports event
- d. A cooking competition

2. Ayşe chose to research forests. — *True / False*

3. Why did Ayşe's town have problems last summer?

- a. A flood
- b. A water shortage
- c. A forest fire
- d. A power cut

4. Emre wants to visit the damaged forest area and take photos, _____ people can really see the problem.

5. What must each project include, according to the teacher?

- a. A video
- b. At least three ways to protect the resource
- c. A poem
- d. An interview with a scientist

Talking About Renewable Energy

Before you listen

- What forms of renewable energy do you know?
- Do you think your city uses much renewable energy?

1. What has been installed on the community centre roof?

- a. Wind turbines
- b. Solar panels
- c. A water tank
- d. A garden

2. Everyone agrees that wind turbines have no disadvantages. — *True / False*

3. According to Speaker B, which energy source works well for people far from the coast?

- a. Wind power
- b. Solar power
- c. Coal power
- d. Water power

4. The solar panels produce enough electricity for the whole building, _____ the centre doesn't need to buy much power anymore.

Protecting Our Natural Resources

Groups of 3-4 · 8-10 min

In your group, discuss three natural resources in your region and agree on the two most important actions your community could take to protect each one.

Useful language: I think we should..., One resource that is at risk is..., In my opinion, the best solution is..., I agree/disagree because..., We could also consider...

1. Choose three natural resources that are important in your region.
2. Discuss why each resource is important and what problems it faces.
3. Agree on two protection actions for each resource.
4. Prepare a short summary to present to the class.

Role-Play: Town Council Meeting

Groups of 4 · 10-12 min

Role-play a town council meeting where members debate a new factory that could bring jobs but may harm a nearby river. Decide together whether to approve it.

Useful language: The factory that we are discussing..., This decision will affect people who..., If we approve this, so..., I'm concerned about..., A fair compromise would be...

1. Assign roles: council leader, factory representative, environmental expert, local resident.
2. Each role prepares two or three points to support their position.
3. Hold the meeting and let each member speak.
4. Vote as a group and explain your final decision.

Writing

Describing a Natural Resource

120-150 words

Write a paragraph describing a natural resource that is important in your region, explaining why it matters and what problems it faces.

Plan:

1. Choose the resource and write one sentence introducing it.
2. List 2-3 reasons why it is important.
3. Note 1-2 problems it faces.
4. Write a closing sentence about its future.

Checklist:

- ☐ I used at least one defining relative clause.
- ☐ I used 'so' to connect a cause and effect.
- ☐ I included at least four topic words.
- ☐ My paragraph has a clear topic sentence.

A Proposal to Protect Nature

130-160 words

Write a short proposal to your school suggesting two or three ways to protect natural resources on campus (for example, water, paper, or energy).

Plan:

1. Introduce the problem in one sentence.
2. Suggest 2-3 clear actions.
3. Explain the benefit of each action using 'so'.
4. End with a short, encouraging conclusion.

Checklist:

- ☐ I suggested at least two clear actions.
- ☐ I explained a benefit for each action.
- ☐ I used 'so' at least once.
- ☐ My proposal is polite and well organised.

1. Which word means 'a fuel that will eventually run out'?
 - a. renewable
 - b. non-renewable
 - c. sustainable
 - d. recyclable
2. The scientist _____ discovered the problem works at our university.
3. The rainforest produces a lot of oxygen, _____ it is important for the whole planet.
 - a. because
 - b. so
 - c. although
 - d. but
4. According to reading passage 1, most of the Earth's water is easy for people to use. — *True / False*
5. In listening 2, what did Speaker B say about wind turbines near towns?
 - a. They are silent.
 - b. They can make noise.
 - c. They are always broken.
 - d. They are illegal.
6. Combine: 'Deforestation destroys habitats. Many animals lose their homes.' (Use 'so'.)
7. Water is a resource _____ every living thing needs.
8. Which is an example of a renewable energy source?
 - a. Coal
 - b. Oil
 - c. Solar power
 - d. Natural gas
9. Put the words in order: so, we, energy, panels, installed, save, solar,
10. What does the word 'endangered' describe?
 - a. A very common animal
 - b. An animal at risk of disappearing
 - c. A pet animal
 - d. A newly discovered animal

Support

1. Match 8 vocabulary words from this theme with their Turkish meanings.
2. Complete 5 gap-fill sentences using 'that', 'which', or 'who' from a given list.
3. Read three short sentences about natural resources and mark them true or false.
4. Copy and complete 4 sentences with 'so' using a word bank.

Core

1. Write 6 original sentences using defining relative clauses about resources or the environment.
2. Write a short paragraph (80-100 words) about one global environmental problem, using 'so' at least twice.
3. Complete the theme's vocabulary quiz with all 20+ words.
4. Prepare 3 discussion questions about protecting natural resources to ask a partner.

Extension

1. Research one real renewable energy project (school-appropriate, general knowledge) and write a 150-word summary using relative clauses and 'so'.
2. Write a one-page proposal for a school 'green initiative' with at least three original suggestions.
3. Create a short dialogue (8-10 lines) between two people debating a local environmental issue.
4. Design a poster plan (in words) explaining how to reduce waste at home, including target vocabulary.

Vocabulary

1. Which word means 'the destruction of forests'?
 - a. pollution
 - b. deforestation
 - c. conservation
 - d. consumption
2. Turning off lights when you leave a room helps _____ energy.
3. 'Emission' most closely means...
 - a. a type of resource
 - b. gas released into the air
 - c. a kind of forest
 - d. a form of water
4. 'Sustainable' means something that can continue without running out. — *True / False*

Grammar

1. The company _____ builds wind turbines is growing fast.
2. Choose the correct sentence.
 - a. The man which planted the trees is my father.
 - b. The man who planted the trees is my father.
 - c. The man whom planted the trees is my father.
 - d. The man which is planted the trees is my father.
3. Combine: 'It didn't rain for months. The crops died.' (Use 'so'.)
4. 'So the lake dried up, farmers lost their crops.' is a correctly formed sentence. — *True / False*

Reading

1. Based on reading 1, what causes water pollution?
 - a. Rain
 - b. Chemicals and waste from factories and farms
 - c. Wind
 - d. Sunlight
2. Based on reading 2, deforestation has no impact on climate change. — *True / False*

Listening

1. In listening 1, which resource did Emre choose to research?

- a. **Water**
- b. Forests
- c. Soil
- d. Air

2. In listening 2, solar panels produce enough electricity for the building, _____ it doesn't need to buy much power.
