1 Before you read

Make predictions before you read.

1. Look at the title. What genre do you think this film is?
2. Guess: what might happen in a film called 'Attack of the Robots'?

Film Review: Attack of the Robots

- 1 'Attack of the Robots' is a new science fiction film, and it is already one of the most popular films of the year. If you enjoy space adventures with exciting special effects, this film is definitely for you.
- 2 The plot follows a young engineer named Mira, who discovers a hidden spaceship in an old factory. Inside, she finds a group of friendly robots who warn her about an alien invasion that is coming to Earth. Mira doesn't trust the robots at first, but she soon realises they need her help.
- 3 Together, Mira and the robots build a new device that can stop the aliens. The special effects in the invasion scenes are incredible — the alien ships look completely real, and the futuristic city looks amazing on the big screen. The film also has a few funny moments, so it isn't only action and drama; it has a little comedy too.
- 4 The main character, Mira, is brave and clever, and the robot characters are surprisingly funny. My favourite character is a small robot called Ziggy, who makes the audience laugh in almost every scene, even during the most dangerous parts of the story.
- 5 Does the film have a happy ending? I won't tell you exactly what happens, but I will say this: 'Attack of the Robots' is an exciting, funny and futuristic film that both teenagers and adults will enjoy. I give it four stars out of five!

6 × 2 pts

Circle the correct option.

1. What is the text mainly about?
☐ a Instructions for building a robot ☐ b A review of a science fiction film
☐ c A true story about aliens
 2. What does Mira discover in the old factory?
☐ a A hidden spaceship ☐ b A new invention shop ☐ c An alien city
 3. What do Mira and the robots build together?
☐ a A new spaceship ☐ b A device to stop the aliens ☐ c A cartoon film
 4. According to the reviewer, what makes the character Ziggy special?
☐ a He is the villain of the film ☐ b He makes the audience laugh ☐ c He doesn't speak in the film
 5. Mira trusts the robots immediately when she meets them. ☐ Correct ☐ Incorrect
-
6. What can you infer about the reviewer's overall opinion of the film?
☐ a The reviewer dislikes the film and doesn't recommend it
☐ b The reviewer enjoys the film and recommends it to others
☐ c The reviewer has no opinion about the film

3 After you read*Write short answers. Then compare with a partner.*

1. Would you like to watch 'Attack of the Robots'? Why or why not? Write two sentences.

2. Think of a film you have seen. Write one sentence describing its plot using the Simple Present.

1. What do you already know about Türkiye's space activities?

2. Guess: what kinds of goals might a national space programme have?

Türkiye's Journey to Space

- 1 In recent years, Türkiye has taken exciting steps into space science and technology. The country now has its own National Space Programme, with clear goals for the future of Turkish space exploration.
- 2 One of the programme's aims is to send more Turkish satellites into orbit to improve communication, weather prediction and agriculture across the country. Engineers and scientists are working on new devices and futuristic technology that will make these satellites smarter and more efficient.
- 3 The programme also has bigger dreams. Officials say that Türkiye will develop its own spaceport in the coming years, and that Turkish astronauts will take part in future international space missions. Some experts predict that within a few decades, Türkiye will also contribute to missions that explore the Moon and beyond.
- 4 Young people play an important part in this journey too. Universities and technology centres across Türkiye now offer programmes where students can study robotics, artificial intelligence and space engineering. Many students dream of becoming the scientists who will discover new technology for future space missions.
- 5 Nobody knows exactly what the future will bring, but one thing is clear: Türkiye's space journey is only just beginning. As one young engineer said in an interview, 'In fifty years, I think our inventions will help people travel further into space than we ever imagined.'

6 × 2 pts

Circle the correct option.

1. What is the text mainly about?
 - ☐ a A science fiction film about space
 - ☐ b Türkiye's National Space Programme and its future plans
 - ☐ c How to become an astronaut
 2. What is one aim of Türkiye's National Space Programme, according to the text?
 - ☐ a To send more Turkish satellites into orbit
 - ☐ b To build a new type of robot
 - ☐ c To make a new film about aliens
 3. What do officials say Türkiye will build in the coming years?
 - ☐ a A new spaceship museum
 - ☐ b Its own spaceport
 - ☐ c A robot factory
 4. What can students study at universities and technology centres, according to the text?
 - ☐ a Robotics, artificial intelligence and space engineering
 - ☐ b Film-making and animation only
 - ☐ c Only foreign languages
 5. The text says that Türkiye's space journey is already finished. ☐ Correct ☐ Incorrect
-
6. What does the young engineer's quotation at the end suggest?
 - ☐ a She is not hopeful about the future of space travel
 - ☐ b She believes future inventions will help people travel further into space
 - ☐ c She thinks space travel is not important

3 After you read

Write short answers. Then compare with a partner.

1. Do you think you would like to work in Türkiye's space programme one day? Why or why not?

2. Write one prediction with 'will' about the future of space travel.
