Aim Learn the target words of the theme with their meanings, pronunciation and examples, and use them correctly in sentences.

A Word list

Read the words and the example sentences aloud.

#	WORD	TYPE	PRONUNCIATION	TÜRKÇE	EXAMPLE
1	cybercrime	n.		siber suç	Cybercrime now costs the world economy far more than traditional theft.
2	hacker	n.		bilgisayar korsanı	A hacker broke into the company's servers and stole customer records.
3	phishing	n.		oltalama (phishing)	The phishing email looked exactly like a real message from her bank.
4	scam	n.		dolandırıcılık, hile	He nearly fell for a scam promising a free holiday.
5	identity theft	n. phrase		kimlik hırsızlığı	Identity theft can take months to sort out once your details have been stolen.
6	data breach	n. phrase		veri ihlali	The data breach exposed the passwords of millions of users overnight.
7	malware	n.		kötü amaçlı yazılım	Opening the attachment installed malware on his laptop without him noticing.
8	ransomware	n.		fıdye yazılımı	The hospital's computer system was frozen by ransomware for three days.
9	two-factor authentication	n. phrase		iki adımlı doğrulama	Even with your stolen password, two-factor authentication can stop a hacker getting in.
10	password manager	n. phrase		parola yöneticisi	A password manager means you never have to remember dozens of passwords yourself.

#	WORD	TYPE	PRONUNCIATION	TÜRKÇE	EXAMPLE
11	encryption	n.		şifreleme	<i>Strong encryption keeps your messages private, even if someone intercepts them.</i>
12	cyberbullying	n.		siber zorbalık	<i>Cyberbullying can follow a victim home and continue at any hour of the day.</i>
13	whistleblower	n.		muhbir, ihbarcı	<i>The whistleblower revealed that the company had hidden the data breach for months.</i>
14	verdict	n.		hüküm, karar	<i>The court's verdict finally gave the victims a sense of justice.</i>
15	accountability	n.		hesap verebilirlik	<i>Real accountability means admitting a mistake, not just apologising in public.</i>
16	loophole	n.		kanun boşluğu, açık	<i>The fraudster found a legal loophole and avoided punishment for years.</i>
17	fall victim to	idiom, v. phrase		kurbanı olmak, mağdur olmak	<i>Even experienced internet users sometimes fall victim to a convincing scam.</i>
18	bring someone to justice	idiom, v. phrase		adaletle teslim etmek	<i>It took investigators two years to bring the hacking group to justice.</i>
19	get away with	phr. v. (transitive)		yanına kâr kalmak, cezasız kalmak	<i>The scammer thought he could get away with it, but the bank traced the transfer.</i>
20	cover your tracks	idiom		izini kaybettirmek	<i>Skilled hackers know how to cover their tracks so investigators can't trace them.</i>

1 Match the words with their meanings.

8 × 1 pts

Write the correct letter in the box.

1 cybercrime

☐

a bilgisayar korsanı

2 hacker

☐

b kötü amaçlı yazılım

3 phishing

☐

c iltalama (phishing)

4 scam

☐

d dolandırıcılık, hile

5 identity theft

☐

e fidye yazılımı

6 data breach

☐

f kimlik hırsızlığı

7 malware

☐

g siber suç

8 ransomware

☐

h veri ihlali

2 Complete the sentences with the words in the box.

8 × 1 pts

Use each word once.

cybercrime

ransomware

hacker

scam

data breach

malware

phishing

identity theft

- _____ now costs the world economy far more than traditional theft.
- A _____ broke into the company's servers and stole customer records.
- The _____ email looked exactly like a real message from her bank.
- He nearly fell for a _____ promising a free holiday.
- _____ can take months to sort out once your details have been stolen.
- The _____ exposed the passwords of millions of users overnight.
- Opening the attachment installed _____ on his laptop without him noticing.
- The hospital's computer system was frozen by _____ for three days.

3 Write your own sentences.

Use each word in a sentence about the theme.

1. **fall victim to**

2. **bring someone to justice**

3. **get away with**

4. **cover your tracks**

Aim Discover the grammar from examples, explain the rule in your own words and use it correctly in context.

Expressing Free Choice: Whoever, Whatever, Whichever, No Matter...

1 · NOTICE

- **Whoever** created that phishing email clearly wanted to trick people into giving away their passwords.
- You can choose **whichever** password manager you trust most — the important thing is that you use one.
- **No matter what** a scammer promises you online, never share your bank details by email.
- **Whatever** method hackers use, a strong firewall and common sense can stop most attacks.

Which words let you talk about any person, thing or choice at all, without limiting it to one specific one?

2 · DISCOVER — A · COMPLETE THE RULE

Look at the Notice sentences again. Complete the rule with the words in the box.

any person

any thing

any one you choose

it makes no difference

1. Whoever means _____.
2. Whatever means _____.
3. Whichever means _____, usually from a limited set of options.
4. No matter what/who/which means _____ — the result stays the same.

B Build sentences

Use the cues to build true or logical sentences using a free-choice expression.

e.g.

you

can install / whichever antivirus program

you prefer

You can install whichever antivirus program you prefer.

1. the police will investigate / whoever is behind the data breach

2. no matter what / a stranger online / promise you never / send money

3. you can report the scam / to whichever authority handles cybercrime in your country
4. whatever / password / you choose make it strong and unique
5. ? / whoever / send / this phishing email know your email address

C Your turn

Write four sentences about online safety using *whoever*, *whatever*, *whichever* and *no matter what/who*.

Whoever...

Whatever...

You can choose whichever...

No matter what...

RULE

Whoever, whatever and whichever mean 'any person/thing/one you choose', without limiting it to one specific option. No matter who/what/which have the same meaning: 'it makes no difference which one'.

TR Whoever (kim olursa olsun), whatever (ne olursa olsun), whichever (hangisini seçerseniz seçin) ve no matter who/what/which (kim/ne/hangisi olursa olsun) ifadeleri, belirli bir kişi, şey ya da seçenekle sınırlı kalmadan 'her kim/her ne/hangisi olursa olsun' anlamı vermek için kullanılır.

When?

We use these expressions when a rule or warning applies to everyone/everything, or when there is free choice between several options — especially in online-safety advice.

TR Bir kuralın ya da uyarının herkes/her şey için geçerli olduğunu vurgularken, ya da birden fazla seçenek arasında serbest seçim olduğunu belirtirken kullanılır — özellikle çevrimiçi güvenlik tavsiyelerinde.

POSITIVE	NEGATIVE	QUESTION	SHORT ANSWERS
Whoever reported the scam did the right thing. You can choose whichever browser you like, as long as you keep it updated.	No matter what he says, don't trust an unexpected money request. Whatever excuse a scammer gives, it doesn't make the request safe.	Whichever service will you use to report the fraud? Does it matter whoever sent the message?	It doesn't matter — no matter who it is, report it. Whichever one — they all work.

X WRONG	✓ RIGHT	WHY?
Whoever is he, don't give him your password.	Whoever he is, don't give him your password.	After whoever, use normal subject-verb word order, not question order. TR Whoever + özne + fiil sırası normal cümle sırasını takip eder, soru sırasını değil.
You can use whatever password manager, it doesn't strong.	You can use whatever password manager you like, as long as it's strong.	Whatever is usually followed by a noun, or noun + subject + verb. TR Whatever'dan sonra genellikle bir isim ya da isim + özne + fiil gelir.
No matter what does he promise, ignore it.	No matter what he promises, ignore it.	After 'no matter what', don't use question word order — use normal statement order. TR 'No matter what' den sonra yardımcı fiil devrik kullanılmaz, düz cümle yapısı gelir.

1 Choose the correct option.

3 × 1 pts

- _____ shares your password with a stranger online is taking a big risk.
☐ a Whoever ☐ b Whatever ☐ c Whichever
- You can report the incident to _____ department deals with cybercrime at your school.
☐ a whoever ☐ b whichever ☐ c whatever
- _____ method scammers use, staying alert is the best protection.
☐ a Whoever ☐ b Whatever ☐ c Which

2 Complete with the correct form.

3 × 1 pts

- _____ (no matter what) a website promises you, never enter your card details on an unsecured page.
- You can choose _____ (whichever) antivirus program fits your budget.
- _____ (whoever) posted that fake giveaway is trying to steal personal information.

3 Judge the sentence.

3 × 1 pts

- Whoever is he, he shouldn't ask for your bank PIN. ☐ Correct ☐ Incorrect
- No matter what happens, always report suspicious messages to an adult or the authorities.
☐ Correct ☐ Incorrect
- You can use whatever device do you want to check your accounts safely. ☐ Correct ☐ Incorrect

4 Complete with a free-choice expression.

2 × 1 pts

Challenge

1. A: _____ (no matter who) contacts you, never share your one-time password by phone.
2. B: Good advice — I'll report it to _____ (whichever) service sent the message.

5 Reorder the sentence.

1 × 1 pts

Challenge

1. says, what no matter he don't reply .

Expressions of Disapproval: Should(n't) Have, Ought to Have, It's Wrong To, I Don't Approve Of

1 · NOTICE

- The company **shouldn't have** ignored so many warnings before the data breach happened.
- He **ought to have** reported the scam the moment he noticed it, not a week later.
- **It's wrong to** read someone else's private messages without their permission.
- **I don't approve of** people who share other students' photos online without asking first.

Which expressions criticise a past action that already happened, and which express disapproval of behaviour in general?

2 · DISCOVER — A · COMPLETE THE RULE

Complete the rule with the words in the box.

a mistake in the past that can't be changed now in general, at any time
a more formal alternative to shouldn't have

1. Should have / shouldn't have + past participle criticises _____.
2. Ought to have + past participle is _____.
3. It's wrong to / I don't approve of + verb criticise behaviour _____.

B Build sentences

Use the cues to build sentences of disapproval.

e.g. the school shouldn't have / ignore the cyberbullying reports

The school shouldn't have ignored the cyberbullying reports.

1. the bank ought to have / warn customers about the phishing emails

2. it's wrong to / share someone's private photos without permission
3. I / don't approve of / people who / spread fake news online
4. they shouldn't have / click on that suspicious link
5. ? / he / ought to have / report the hacker to the police

C Your turn

Write four sentences disapproving of unethical online behaviour, using *should(n't) have*, *ought to have*, *it's wrong to*, and *I don't approve of*.

He shouldn't have... *They ought to have...* *It's wrong to...* *I don't approve of...*

RULE

Should have / shouldn't have + past participle criticises a past mistake that can't be undone. Ought to have + past participle is a more formal alternative with the same meaning. It's wrong to + verb and I don't approve of + verb-ing express general disapproval of behaviour.

TR Should have / shouldn't have + V3 (geçmiş zaman ortacı), geçmişte yapılan ya da yapılmayan bir hatayı eleştirmek için kullanılır ve artık değiştirilemez. Ought to have + V3, 'shouldn't have' ile aynı anlamda ama daha resmi bir alternatiftir. It's wrong to + fiil ve I don't approve of + fiil-ing ise genel olarak bir davranışı onaylamadığınızı belirtmek için kullanılır.

When?

Use *should(n't) have* / *ought to have* to criticise a specific past mistake; use *it's wrong to* / *I don't approve of* to criticise unethical behaviour in general — especially when discussing cybercrime and online ethics.

TR Geçmişte olan bir hatayı eleştirirken *should(n't) have* / *ought to have*; genel olarak etik olmayan bir davranışı eleştirirken *it's wrong to* / *I don't approve of* kullanılır — özellikle siber suç ve çevrimiçi etik konularında.

POSITIVE	NEGATIVE	QUESTION	SHORT ANSWERS
He should have changed his password sooner. It's wrong to hack into someone's account, even as a joke.	She shouldn't have opened that attachment. I don't approve of people who spy on their friends' accounts.	Should the company have informed its customers earlier? Ought they to have reported the fraud immediately?	Yes, they should have. / No, they shouldn't have. Yes, they ought to. / No, they oughtn't to.

X WRONG	✓ RIGHT	WHY?
He should have go to the police.	He should have gone to the police.	Should have is followed by the past participle (V3), not the base form. TR Should have'den sonra V3 (past participle) gelir, base form değil.
It's wrong to shared private information.	It's wrong to share private information.	'It's wrong to' is followed by the to-infinitive (base form), not the past form. TR 'It's wrong to' bir fiilin base (to-infinitive) hâliyle kullanılır.
I don't approve to people who bully others online.	I don't approve of people who bully others online.	'Approve' is followed by the preposition 'of', not 'to'. TR 'Approve' fiilinden sonra gelen edat 'of'tur, 'to' değil.

6 Choose the correct option.

3 × 1 pts

- She _____ her card details with that website — it turned out to be a scam.
 (a) shouldn't have shared (b) don't approve of sharing (c) is wrong to share
- _____ read your classmate's private messages without asking.
 (a) It's wrong to (b) You shouldn't approve (c) Ought you
- I really _____ people who post other people's photos without permission.
 (a) don't approve of (b) shouldn't have approved (c) wrong to approve

7 Complete with the correct form.

3 × 1 pts

- The company _____ (ought to / warn) users sooner about the data breach.
- It's wrong _____ (to / read) someone's emails without permission.
- He _____ (shouldn't / click) on that link — now his account is hacked.

8 Judge the sentence.

3 × 1 pts

- He should have reported the hacker sooner. ☐ Correct ☐ Incorrect

- It's wrong to sharing someone's private photos. ☐ Correct ☐ Incorrect

- I don't approve to cyberbullying in any form. ☐ Correct ☐ Incorrect

9 Complete with the correct form.

2 × 1 pts

Challenge

1. A: Did you hear? Someone _____ (shouldn't / open) that email — now the whole office computer is infected.
2. B: I agree. _____ (it's wrong to) open attachments from unknown senders.

10 Reorder the sentence.

1 × 1 pts

Challenge

1. approve any in I cyberbullying don't of form .

B1+/B2

Bandits Without Borders · Justice in the Digital Age

Hazırlık Sonrası 10. Sınıf

Name – Surname

Class

No

Date

Aim Understand the main idea and details, make inferences and connect the text to your own life.

1 Before you read

Make predictions before you read.

1. What do you think the title 'Bandits Without Borders' might mean?
2. Have you or someone you know ever received a suspicious message online? What happened?

Bandits Without Borders

- 1 A century ago, a bandit needed a horse, a weapon and a lonely mountain road. Today's most successful criminals need none of these things — only a laptop, a stable internet connection and a convincing lie. Cybercrime has turned the whole planet into a kind of open territory, where a thief in one country can empty a stranger's bank account on the other side of the world without ever leaving their chair. Because these crimes cross borders so easily, catching the people responsible is far harder than catching a bandit on a single road.
- 2 Many cybercriminals don't break into computers at all — they trick people into opening the door themselves. This is known as phishing: sending a message that looks like it comes from a bank, a delivery company or even a friend, designed to make the reader click a link or hand over a password. The most dangerous scams don't rely on clever code; they rely on urgency and fear, pushing victims to act before they stop to think.
- 3 Fighting back doesn't always require expensive software. Simple habits — using a different password for every account, thinking twice before clicking an unexpected link, and turning on two-factor authentication — stop the vast majority of attacks before they start. Cyberspace may feel like bandit territory, but every careful user makes it a little less lawless.

226 words

2 While you read

5 × 2 pts

Circle the correct option.

1. What is the main idea of the text?
☐ a Cybercriminals always use highly advanced computer code.
☐ b Modern cybercrime crosses borders easily and often relies on tricking people rather than complex hacking.
☐ c Phishing emails are impossible to prevent.
2. Tricking someone into clicking a link or giving away a password by pretending to be a trusted sender is called _____.
3. According to the text, what do the most dangerous scams rely on?
☐ a expensive software ☐ b urgency and fear ☐ c weapons
4. According to the text, cybercrime is harder to stop than traditional crime partly because it crosses borders so easily. ☐ Correct ☐ Incorrect
5. The text suggests that using a different password for every account and turning on _____ can prevent most attacks.

3 After you read*Write short answers. Then compare with a partner.*

1. Which safety habit from the text do you already follow? Which one will you start?

2. Why do you think cybercriminals often target people's emotions rather than their computers?

1 Before you read*Make predictions before you read.*

1. What do you think 'poetic justice' means? Can you think of an example from a film or story?

2. Do you think online crimes are punished as seriously as offline crimes? Why or why not?

Justice in the Digital Age

- 1 When a burglar breaks a window, the evidence is easy to see. When a hacker breaks into an account, the evidence is a string of invisible code, and that makes justice much harder to deliver. Courts

around the world are now training specialist judges and detectives simply to keep up with crimes that didn't exist twenty years ago, from ransomware attacks on hospitals to the theft of millions of people's personal data in a single breach.

- 2 Poetic justice — the idea that wrongdoers eventually get the punishment they deserve, often in a fitting or ironic way — has always fascinated storytellers. In the digital world, this sometimes happens by accident: a scammer's own device gets infected by the same malware they used on others, or a hacker is caught because they bragged about the crime online. Real justice, however, rarely arrives so neatly; most cybercriminals are never identified at all.
- 3 That's why fairness in the digital age depends on more than punishment after the fact. Companies are expected to protect the data they collect, whistleblowers who expose wrongdoing deserve legal protection rather than punishment, and ordinary users need clear, simple laws they can actually understand. A just digital world isn't only about catching criminals — it's about building a system where trust is earned and protected in the first place.

220 words

2 While you read

5 × 2 pts

Circle the correct option.

1. What is the main idea of the text?
 - a Digital crime is always punished quickly and fairly.
 - b Delivering justice for digital crime is difficult, and fairness requires more than just catching criminals.
 - c Poetic justice always happens to cybercriminals.
 2. The idea that wrongdoers eventually get a fitting or ironic punishment is called _____.
 3. According to the text, why is delivering justice for hacking often harder than for burglary?
 - a Hacking evidence is invisible code, unlike a broken window.
 - b Hacking is not actually against the law.
 - c Judges refuse to study new types of crime.
 4. According to the text, most cybercriminals are eventually identified and punished.

☐ Correct ☐ Incorrect
-
5. The text says people who expose wrongdoing, known as _____, deserve legal protection.

3 After you read

Write short answers. Then compare with a partner.

1. Why might 'poetic justice' happen more often in stories than in real life?

2. What responsibility do you think companies have to protect the data they collect from us?

Speaking & Writing

Speaking and writing tasks

B1+ / B2

Hazırlık Sonrası 10. Sınıf

Name – Surname

Class

No

Date

Aim Use the words and structures of the theme in real communication tasks.

S1 Who's to Blame?

In pairs, discuss a scenario: a classmate lost money after clicking a fake prize link. Whose fault is it, and could it have been prevented? Use disapproval expressions (shouldn't have, it's wrong to) and free-choice expressions (whoever, whatever, no matter what) where natural.

S2 Presenting an Online Safety Rule

Prepare a two-minute talk about one type of cybercrime (such as phishing, ransomware or cyberbullying) and one online-safety rule connected to it. Explain what the crime involves, why it matters, and what people should or shouldn't do to stay safe.

W1 A Cybercrime Awareness Article

Write a short magazine article warning teenage readers about one type of cybercrime (phishing, cyberbullying, identity theft, etc.). Start with a clear topic sentence, add at least three supporting sentences with details and examples, and finish with a concluding sentence giving advice.

CHECKLIST

- ☐ Clear topic sentence at the start
- ☐ At least 3 supporting sentences with details/examples
- ☐ A clear concluding sentence with advice
- ☐ Uses at least 2 vocabulary words from this theme
- ☐ 150–180 words

W2 A Fair Verdict

Write a short opinion paragraph giving your view on how society should treat cybercriminals. Should punishments for cybercrime be as serious as for 'real-world' crime? Support your opinion with at least two reasons.

CHECKLIST

- ☐ Clear opinion stated in the first sentence
- ☐ At least 2 reasons supporting the opinion
- ☐ Uses at least one disapproval expression (shouldn't have / it's wrong to)
- ☐ Persuasive, respectful tone
- ☐ 150–180 words

YEAR 10 (AFTER PREP) · THEME 8 · CRIME IN SOCIETY

Revision

B1+/B2

Revision and homework

Hazırlık Sonrası 10. Sınıf

Name – Surname _____ Class _____ No _____ Date _____

Aim Revise the key points of the theme with short questions.

1 Quick check

13 × 1 pts

Answer the questions. Check your mistakes in the related section.

- After clicking the link, she realised too late that it was a _____.
 (a) phishing scam (b) password manager (c) whistleblower
- _____ sent this message is hoping you'll panic and click without thinking.
 (a) Whoever (b) Whatever (c) Whichever
- You can use _____ (whichever) antivirus program you trust, as long as you keep it updated.
- He _____ (shouldn't / share) his password with a stranger online.
- Which sentence correctly expresses general disapproval?
 (a) It's wrong to hack into someone's account. (b) It's wrong hacking into someone's account.
 (c) It's wrong to hacked into someone's account.
- No matter what does a scammer say, never share your one-time password. ☐ Correct ☐ Incorrect

- The company _____ (ought to / warn) customers sooner about the data breach.
- A message pretending to be from your bank, designed to steal your password, is called _____.
 (a) a firewall (b) phishing (c) encryption
- Someone who exposes wrongdoing inside an organisation is called a _____.
- money any don't he what no send him matter promises, .

- He should have report the scam immediately. ☐ Correct ☐ Incorrect

- Rewrite using a free-choice expression. (It doesn't matter which password manager you choose — just use one. (whichever))

- It can take a long time for the police to identify _____ (whoever) is behind a large-scale data breach.

2 Homework

Choose the tasks for your level.

LEVEL	TASK
Support	Match 8 vocabulary words from this theme to their Turkish meanings.
	Complete 5 gap-fill sentences using whoever, whatever or whichever.
	Copy out 6 disapproval expressions from this theme (shouldn't have, ought to have, it's wrong to, I don't approve of) and write one example sentence for each.
	Complete a short gap-fill about online safety using should have / shouldn't have.
Core	Write 5 sentences giving online-safety advice using whoever, whatever, whichever or no matter what.
	Complete the Grammar 1 and Grammar 2 practice sections online.
	Write a short dialogue (6–8 lines) between two friends, one of whom nearly fell for an online scam.
	Choose five vocabulary words from this theme and use each one in your own sentence about online safety or justice.
Extension	Research a real news story about a cybercrime case and write a short paragraph (80–100 words) summarising what happened and how it was resolved.
	Record a 1-minute voice note giving three pieces of advice for staying safe online.
	Design a one-page poster warning students about one type of cybercrime, including a slogan and three safety tips.
	Interview a family member about whether they have ever received a scam message, and write a 100-word paragraph about what happened and what they learned.

MY PROGRESS — I CAN...

- ☐ understand the main ideas of this theme.
- ☐ use the target words.
- ☐ use the target grammar.
- ☐ talk about this theme.
- ☐ write about this theme.
