Grammar

Should / Shouldn't — Giving Health Advice

Use 'should'/'shouldn't' to give advice or recommendations, not strict obligations.

'Should/shouldn't' tavsiye vermek için kullanılır; 'must' kadar katı bir zorunluluk bildirmez.

When? Use should/shouldn't for health and well-being advice.

Sağlık ve iyi oluş ile ilgili tavsiyeler için kullanılır.

- ☐ c. You should sleeping more.
- ☐ d. You shoulds sleep more.

Should + base verb.

4. Rewrite as advice: it's a bad idea to skip breakfast. (Use shouldn't) **You shouldn't skip breakfast.**

Taking Care of Your Well-Being

Before you read

- What do you do to stay healthy?

Well-being is not just about avoiding illness — it also means taking care of your body and mind. Doctors recommend eating a balanced diet, getting enough sleep, and doing regular physical activity to strengthen your immune system.

When you do get sick, common symptoms like a headache or a sore throat usually mean your body needs rest. If symptoms don't improve, a doctor may prescribe medicine to help you recover faster. You should always follow the doctor's advice carefully.

For mental well-being, experts suggest stress management techniques such as mindfulness and good posture while studying. You shouldn't ignore stress — small habits like short breaks and deep breathing can make a big difference for your future health.

1. What do doctors recommend for physical health?

- a. Skipping meals
