Should / Shouldn't — Giving Health Advice

Use 'should'/'shouldn't' to give advice or recommendations, not strict obligations.

'Should/shouldn't' tavsiye vermek için kullanılır; 'must' kadar katı bir zorunluluk bildirmez.

When? Use should/shouldn't for health and well-being advice.

Sağlık ve iyi oluş ile ilgili tavsiyeler için kullanılır.

Positive

- You should rest more.

Negative

- You shouldn't skip meals.

Question

- Should I see a doctor?

Short answers

- Yes, you should. / No, you shouldn't.

Common mistakes

- ~~You should to rest.~~ → **You should rest.**

- You _____ (should) drink plenty of water when you're ill.
- You _____ (shouldn't) stay up too late before an exam.
- Choose the correct sentence.
 - a. You should to sleep more.
 - b. You should sleep more.
 - c. You should sleeping more.
 - d. You shoulds sleep more.
- Rewrite as advice: it's a bad idea to skip breakfast. (*Use shouldn't*)

Taking Care of Your Well-Being

Before you read

- What do you do to stay healthy?

Well-being is not just about avoiding illness — it also means taking care of your body and mind. Doctors recommend eating a balanced diet, getting enough sleep, and doing regular physical activity to strengthen your immune system.

When you do get sick, common symptoms like a headache or a sore throat usually mean your body needs rest. If symptoms don't improve, a doctor may prescribe medicine to help you recover faster. You should always follow the doctor's advice carefully.

For mental well-being, experts suggest stress management techniques such as mindfulness and good posture while studying. You shouldn't ignore stress — small habits like short breaks and deep breathing can make a big difference for your future health.

1. What do doctors recommend for physical health?
 - a. Skipping meals
 - b. A balanced diet, sleep, and activity
 - c. Only medicine
 - d. Avoiding exercise
2. A doctor may _____ medicine if symptoms don't improve.
3. The text says you should ignore stress. — *True / False*

After you read

- What is one stress management technique you use?

At the School Nurse's Office

Before you listen

- What do you say to a school nurse when you feel unwell?
1. What symptom does the student have?
 - a. A headache
 - b. A sore throat
 - c. A broken arm
 - d. A cold
 2. The nurse advises the student to _____ their voice.

Giving Health Advice

Pairs · 8 min

Take turns describing a symptom and giving your partner advice using should/shouldn't.

Useful language: I have a..., You should..., You shouldn't..., Maybe you should see a doctor.

1. Student A describes a symptom.
2. Student B gives two pieces of advice.
3. Swap roles and repeat.

Writing

A Well-Being Guide

100-120 words

Write a short guide giving advice on how students can look after their physical and mental well-being.

Plan:

1. Give two pieces of advice about physical health using should.
2. Give one piece of advice about mental well-being.
3. Mention one thing students shouldn't do.

Checklist:

- ☐ I used should/shouldn't correctly.
- ☐ I included physical and mental well-being advice.
- ☐ I used at least three theme vocabulary words.

1. 'Belirti' means _____.
 - a. symptom
 - b. recover
 - c. posture
 - d. immune system
2. You _____ (should) rest when you feel unwell.
