A City of Contrasts

Before you read

- Have you ever visited a historical site in your city?

Our city is full of contrasts. On one hand, it has a rich cultural heritage — I have visited the old town's historical sites many times, and every spring there is a colourful festival with music, food, and traditional dance.

On the other hand, the city faces real problems. Traffic jams are common during rush hour, and some neighbourhoods have become overcrowded. Air pollution and noise are also growing concerns for many families.

Fortunately, the local community hasn't stayed silent. Volunteers have organised recycling programmes, and the old theatre near the main square has recently been renovated. Many residents have taken part in clean-up days to protect the city's future.

1. What problem is mentioned besides traffic?
 - a. Too many festivals
 - b. Air pollution and noise
 - c. Too much recycling
 - d. Empty streets
2. The old theatre has recently been ____.
3. The community has done nothing to solve the problems. — *True / False*

After you read

- What problems does your own city or town have?
