Will / Won't — Predictions About the Future

Use 'will'/'won't' to make predictions about the future, often with words like 'probably' or 'I think'.

Gelecekle ilgili tahminlerde 'will/won't' kullanılır; genellikle 'probably' veya 'I think' ile birlikte kullanılır.

When? Use will/won't for predictions about future space exploration and technology.

Geleceğin uzay keşfi ve teknolojisi hakkında tahminlerde kullanılır.

Positive

- Humans will visit Mars.

Negative

- We won't colonise other galaxies soon.

Question

- Will people live in space one day?

Short answers

- Yes, they will. / No, they won't.

Common mistakes

- ~~Humans will to live on Mars.~~ → **Humans will live on Mars.**

1. I think humans _____ (will) colonise Mars within a century. **(will)**

Prediction.

2. Robots _____ (not/replace) all astronauts completely. **(won't replace)**

Negative prediction.

3. Choose the correct sentence.

- a. Space travel will probably cheaper.
- b. Space travel will probably be cheaper. ✓
- c. Space travel probably will cheaper.
- d. Space travel will be probably cheaper.

Will + probably + be + adjective.

4. Rewrite as a prediction: it's likely that scientists find water on Mars. (Use *will probably*) **Scientists will probably find water on Mars.**

Life on a Space Station

Before you read

- What do you think daily life is like for an astronaut?

Living on a space station is very different from life on Earth. Astronauts experience weightlessness, so everyday tasks like eating and sleeping require special equipment and training. A mission on the International Space Station usually lasts about six months.

Space exploration is developing fast. Scientists send probes and spacecraft to study distant planets, and many experts believe humans will land on Mars within the next few decades. Some scientists even think we will try to colonise Mars one day, using advanced technology to sustain human life there.

Of course, nobody knows the future for certain. Space travel probably won't become as easy as taking a plane any time soon, but each new mission brings us closer to answering big questions about our universe.

1. How long does a typical ISS mission last?

- a. One month
- b. Six months ✓
- c. One year
- d. Ten years

"usually lasts about six months".

2. Astronauts experience _____ on the space station. **(weightlessness)**

Directly stated.

3. The text says space travel will definitely become as easy as flying by plane soon. — True / False **(Incorrect — The text says it probably won't become that easy soon.)**

Opposite is stated.

After you read

- Would you like to become an astronaut? Why or why not?

An Interview With a Space Scientist

Before you listen

- What questions would you ask a space scientist?

1. What does the scientist predict about Mars?

- a. Humans will never visit it
- b. Humans will probably visit it within decades ✓
- c. It will be colonised next year
- d. Nothing is known

Stated by the scientist.

2. The scientist says robots _____ (won't) replace astronauts completely. **(won't)**

Negative prediction.

Transcript (teacher use)

Interviewer Do you think humans will visit Mars in our lifetime?

Scientist I believe we will probably visit Mars within the next few decades.

Interviewer Will robots replace astronauts completely?

Scientist No, I don't think so — robots won't replace astronauts completely, but they will help with dangerous tasks.

1. 'Astronot' means _____.

- a. astronaut ✓
- b. spacecraft
- c. probe
- d. mission

Astronaut = astronot.

2. I think humans _____ (will) visit Mars one day. **(will)**

Prediction.

3. How long does a typical space station mission last, according to the text?

- a. A week
- b. A month
- c. Six months ✓
- d. Two years

Stated in the reading.

4. 'Weightlessness' means having no sensation of weight. — True / False **(Correct)**

Correct definition.

5. Robots _____ (won't) replace all astronauts. **(won't)**

Negative prediction.

6. According to the scientist in the listening, when might humans visit Mars?

- a. Never
- b. Within a few decades ✓
- c. Next year
- d. In 500 years

Stated in the transcript.

7. 'Görev' means _____.

- a. mission ✓
- b. launch
- c. probe
- d. prediction

Mission = görev.

8. The rocket will _____ tomorrow morning. **(launch)**

Launch a rocket collocation.

1. 'Uzay aracı' means _____.

- a. spacecraft ✓
- b. space station
- c. probe
- d. mission

Spacecraft = uzay aracı.

2. Scientists hope to _____ (colonise) Mars one day. **(colonise)**

Verb meaning.

1. Space travel _____ (will) probably become cheaper. **(will)**

Prediction.

2. Choose the correct sentence.

- a. Humans will to live on Mars.
- b. Humans will live on Mars. ✓
- c. Humans living will on Mars.
- d. Humans will living on Mars.

Will + base verb.

1. What do probes and spacecraft help scientists do, according to the text?

- a. Study distant planets ✓
- b. Replace astronauts
- c. Colonise Earth
- d. Avoid space travel

Stated in the reading.

1. The scientist believes robots will help with dangerous tasks. — True / False **(Correct)**

Confirmed in the transcript.
