Vocabulary — 12 words

Word	IPA	Turkish	Example
space station <i>noun</i>	/speɪs 'steɪʃən/	uzay istasyonu	Astronauts live on the International Space Station for months.
astronaut <i>noun</i>	/ˈæstrənɔːt/	astronot	The astronaut spent six months in orbit.
spacecraft <i>noun</i>	/ˈspeɪskræft/	uzay aracı	The spacecraft landed safely on the Moon.
weightlessness <i>noun</i>	/ˈweɪtləsnes/	ağırlıksızlık	Astronauts float because of weightlessness.
exploration <i>noun</i>	/ˌeksplə'reɪʃən/	keşif	Space exploration has advanced quickly in recent years.
launch <i>verb/noun</i>	/lɔːntʃ/	fırlatmak	The rocket will launch tomorrow morning.
colonise <i>verb</i>	/ˈkɒlənaɪz/	koloni kurmak	Scientists hope to colonise Mars one day.
mission <i>noun</i>	/ˈmɪʃən/	görev	The mission to Mars will take several years.
prediction <i>noun</i>	/prɪˈdɪkʃən/	tahmin	Scientists made a prediction about future space travel.
advanced technology <i>noun</i>	/ədˈvænst tek 'nɒlədʒi/	gelişmiş teknoloji	Advanced technology allows longer space missions.
sustain <i>verb</i>	/səˈsteɪn/	sürdürmek	The station must sustain life for months.
probe <i>noun</i>	/praʊb/	uzay sondası	The space probe sent photos of Jupiter back to Earth.

Will / Won't — Predictions About the Future

Use 'will'/'won't' to make predictions about the future, often with words like 'probably' or 'I think'.

Gelecekle ilgili tahminlerde 'will/won't' kullanılır; genellikle 'probably' veya 'I think' ile birlikte kullanılır.

When? Use will/won't for predictions about future space exploration and technology.

Geleceğin uzay keşfi ve teknolojisi hakkında tahminlerde kullanılır.

Positive

- Humans will visit Mars.

Negative

- We won't colonise other galaxies soon.

Question

- Will people live in space one day?

Short answers

- Yes, they will. / No, they won't.

Common mistakes

- ~~Humans will to live on Mars.~~ → **Humans will live on Mars.**

1. I think humans _____ (will) colonise Mars within a century.

2. Robots _____ (not/replace) all astronauts completely.

3. Choose the correct sentence.

- a. Space travel will probably cheaper.
- b. Space travel will probably be cheaper.
- c. Space travel probably will cheaper.
- d. Space travel will be probably cheaper.

4. Rewrite as a prediction: it's likely that scientists find water on Mars. (*Use will probably*)

Life on a Space Station

Before you read

- What do you think daily life is like for an astronaut?

Living on a space station is very different from life on Earth. Astronauts experience weightlessness, so everyday tasks like eating and sleeping require special equipment and training. A mission on the International Space Station usually lasts about six months.

Space exploration is developing fast. Scientists send probes and spacecraft to study distant planets, and many experts believe humans will land on Mars within the next few decades. Some scientists even think we will try to colonise Mars one day, using advanced technology to sustain human life there.

Of course, nobody knows the future for certain. Space travel probably won't become as easy as taking a plane any time soon, but each new mission brings us closer to answering big questions about our universe.

1. How long does a typical ISS mission last?

- a. One month
- b. Six months
- c. One year
- d. Ten years

2. Astronauts experience _____ on the space station.

3. The text says space travel will definitely become as easy as flying by plane soon. — *True / False*

After you read

- Would you like to become an astronaut? Why or why not?

An Interview With a Space Scientist

Before you listen

- What questions would you ask a space scientist?
1. What does the scientist predict about Mars?
 - a. Humans will never visit it
 - b. Humans will probably visit it within decades
 - c. It will be colonised next year
 - d. Nothing is known
 2. The scientist says robots _____ (won't) replace astronauts completely.

Predictions About Space

Groups of 3 · 8 min

Discuss three predictions about the future of space travel using will/won't.

Useful language: I think... will..., ...probably won't..., In the future, humans will...

1. Brainstorm three predictions about space travel.
2. Discuss how likely each one is.
3. Share your group's most interesting prediction with the class.

Writing

Life in the Future

100-120 words

Write a paragraph with your predictions about space exploration and life in the future, using will/won't.

Plan:

1. Make two predictions about space exploration using will.
2. Make one prediction about what won't happen soon.
3. Explain why you think this.

Checklist:

- ☐ I used will/won't correctly.
- ☐ I made at least three predictions.
- ☐ I used theme vocabulary about space.

1. 'Astronot' means _____.
 - a. astronaut
 - b. spacecraft
 - c. probe
 - d. mission
2. I think humans _____ (will) visit Mars one day.
3. How long does a typical space station mission last, according to the text?
 - a. A week
 - b. A month
 - c. Six months
 - d. Two years
4. 'Weightlessness' means having no sensation of weight. — *True / False*
5. Robots _____ (won't) replace all astronauts.
6. According to the scientist in the listening, when might humans visit Mars?
 - a. Never
 - b. Within a few decades
 - c. Next year
 - d. In 500 years
7. 'Görev' means _____.
 - a. mission
 - b. launch
 - c. probe
 - d. prediction
8. The rocket will _____ tomorrow morning.

Homework

AbOnlinEnglish Upper Secondary — Lise Hazırlık — Complete Theme · Orijinal içerik, TYMM müfredatıyla uyumlu.

Vocabulary

1. 'Uzay aracı' means _____.
 - a. spacecraft
 - b. space station
 - c. probe
 - d. mission
2. Scientists hope to _____ (colonise) Mars one day.

Grammar

1. Space travel _____ (will) probably become cheaper.
2. Choose the correct sentence.
 - a. Humans will to live on Mars.
 - b. Humans will live on Mars.
 - c. Humans living will on Mars.
 - d. Humans will living on Mars.

Reading

1. What do probes and spacecraft help scientists do, according to the text?
 - a. Study distant planets
 - b. Replace astronauts
 - c. Colonise Earth
 - d. Avoid space travel

Listening

1. The scientist believes robots will help with dangerous tasks. — *True / False*
