

Answer Key

Grammar

Have to / Don't have to — Facts and Necessity

Use 'have to' for things that are necessary (facts or rules), and 'don't have to' when something is not necessary.

'Have to' bir şeyin gerekli olduğunu (kural ya da gerçek), 'don't have to' ise gerekli olmadığını belirtir.

When? Use have to/don't have to for scientific facts and necessities related to space.

Uzayla ilgili bilimsel gerçekler ve zorunluluklar için kullanılır.

Positive

- Astronauts have to train for years.

Negative

- We don't have to worry about gravity on Earth.

Question

- Do astronauts have to wear helmets?

Short answers

- Yes, they do. / No, they don't.

Common mistakes

- ~~Astronauts has to wear suits.~~ → **Astronauts have to wear suits.**

1. Astronauts _____ (have to) wear special suits in space. **(have to)**

Necessity.

2. On Earth, we _____ (not/have to) wear oxygen tanks. **(don't have to)**

Not necessary.

3. Choose the correct sentence.

- a. She have to study space science.
- b. She has to study space science. ✓
- c. She having to study space science.
- d. She haves to study space science.

Third person: has to.

4. Rewrite: it is necessary for satellites to orbit fast. (Use have to) **Satellites have to orbit fast.**

Our Solar System

Before you read

- How many planets do you know in our solar system?

Our solar system has eight planets that orbit the Sun. The closest planet to the Sun is Mercury, and the farthest is Neptune. Each planet has a different surface, atmosphere, and temperature.

Earth is special because it has an atmosphere that we can breathe and a perfect distance from the Sun, which keeps the temperature comfortable for life. Astronauts who travel to other planets have to wear special suits, because those planets don't have a breathable atmosphere.

The Moon is Earth's only natural satellite. It doesn't have its own light — it simply reflects light from the Sun. Many other planets in our solar system, like Jupiter and Saturn, have several moons.

1. Which planet is closest to the Sun?

- a. Earth
- b. Mercury ✓
- c. Neptune
- d. Mars

"The closest planet to the Sun is Mercury".

2. The Moon is Earth's only natural _____. (satellite)

Directly stated.

3. Astronauts don't have to wear special suits on other planets. — True / False (Incorrect — They have to wear special suits.)

Text states the opposite.

After you read

- Which planet would you like to visit, and why?

A School Trip to the Planetarium

Before you listen

- Have you ever visited a planetarium or observatory?
1. How many moons does Jupiter have, according to the guide?
- a. One
 - b. Several ✓
 - c. None
 - d. Two

The guide says Jupiter has several moons.

2. Students _____ (have to) wear headphones during the show. **(have to)**

Necessity stated by the guide.

Transcript (teacher use)

Guide Welcome to the planetarium! Today we'll learn about our solar system.

Guide You have to wear headphones during the show so you can hear the narration clearly.

Student How many moons does Jupiter have?

Guide Great question! Jupiter has several moons, more than any other planet.

1. 'Yerçekimi' means _____.

- a. gravity ✓
- b. orbit
- c. atmosphere
- d. galaxy

Gravity = yerçekimi.

2. Astronauts _____ (have to) train for years. **(have to)**

Necessity.

3. Which planet is farthest from the Sun?

- a. Mercury
- b. Earth
- c. Neptune ✓
- d. Mars

Stated in the reading.

4. The Moon reflects light from the Sun. — True / False **(Correct)**

Confirmed in the reading.

5. We _____ (not/have to) wear spacesuits on Earth. **(don't have to)**

Not necessary.

6. According to the listening, students have to wear what?

- a. Suits
- b. Helmets
- c. Headphones ✓
- d. Gloves

Stated in the transcript.

7. 'Uydu' means _____.

- a. satellite ✓
- b. galaxy
- c. orbit
- d. surface

Satellite = uydu.

8. The Earth _____ (rotate) once every 24 hours. **(rotates)**

Present simple fact.
