

Speaking

Is There Life Out There?

Pairs · 8-10 min

Discuss with your partner whether you believe life exists on other planets, and give reasons for your opinion using conditional sentences.

Useful language: In my opinion, ..., I believe that if ..., then ..., That's an interesting point, but ..., I partly agree, however ..., What makes you think that?

1. Work with a partner. Decide who will speak first.
2. Share your opinion about life on other planets and explain why.
3. Use at least one zero conditional and one first conditional sentence in your discussion.
4. Listen to your partner's opinion and ask a follow-up question.
5. Together, agree on one prediction about the future of this topic.

Plan a Space Mission

Groups of 3-4 · 10 min

In your group, design an imaginary mission to explore a planet or moon of your choice, and present your plan to the class.

Useful language: Our mission will explore ..., If we find ..., we will ..., The crew will need ..., We predict that ...

1. Choose a planet or moon to explore.
2. Decide on the crew, the equipment, and the length of the mission.
3. Predict what might happen using first conditional sentences.
4. Prepare a short presentation (2-3 minutes) for the class.
5. Present your mission and answer questions from classmates.

Writing

Describe a Planet

120-150 words

Choose a planet from our solar system and write a short descriptive text about it, including at least one zero conditional sentence.

Plan:

1. Choose your planet and note 3-4 key facts about it.
2. Decide how to organise your paragraphs (introduction, facts, conclusion).
3. Think of one zero conditional fact you can include.

Checklist:

- ☐ Did I include at least three facts about the planet?
- ☐ Did I use at least one zero conditional sentence correctly?
- ☐ Did I use topic-related vocabulary?
- ☐ Did I check my spelling and punctuation?

The Future of Space Travel

150-180 words

Write a short essay giving your predictions about the future of space travel, using first conditional sentences.

Plan:

1. Brainstorm 2-3 predictions about future space travel.
2. Organise your ideas into an introduction, body, and conclusion.
3. Plan at least two first conditional sentences to support your predictions.

Checklist:

- ☐ Did I include at least two clear predictions?
- ☐ Did I use first conditional sentences correctly?
- ☐ Did I organise my essay into clear paragraphs?
- ☐ Did I check grammar and word count?
