Transcript · A Class Trip to the Nature Reserve

Deniz That trip to Green Valley Nature Reserve was amazing! I didn't know there were cheetahs so close to our town.

Elif I know! Ms Aylin said that fifty years ago, this whole area was open grassland, full of wild animals.

Deniz Really? So there weren't any farms or roads here back then?

Elif No, there weren't. It was all natural habitat. Now only the reserve protects that grassland.

Deniz I liked the animal shelter too. Was there always a shelter like that?

Elif No, there wasn't — it opened in 2015. Before that, injured animals didn't have anywhere safe to go.

Deniz We should visit again next year. Maybe we can join a conservation project.

Elif Good idea! I think we should ask our teacher about that tomorrow.

Transcript · Planning a Project on Endangered Animals

Deniz For our project, I think we should choose the cheetah. It's endangered and really interesting.

Elif Good idea. We should explain its habitat first — grasslands, mostly in Africa.

Deniz Right. And we shouldn't forget the threats — illegal hunting and habitat loss.

Elif Exactly. I read that we should also mention climate change as a threat.

Deniz Should we include some advice for our classmates too? Like what they can do?

Elif Yes, definitely. We should tell them not to buy illegal animal products.

Deniz Good point. Should we make a poster or a short presentation?

Elif Let's do both — a poster with pictures, and a short spoken presentation.
