Transcript · Choosing a Movie for Friday Night

Ege Hey, do you want to watch a film on Friday night? I really want to see something new.

Sude Sure! What genre do you feel like? I love comedies, but I know you prefer action films.

Ege Actually, I'd like to try something different. What about that new science fiction film, 'Attack of the Robots'?

Sude Oh, I read a review of that! It follows an engineer who discovers a spaceship and has to stop an alien invasion.

Ege That sounds exciting! Does it have good special effects?

Sude Yes, apparently they're amazing. The reviewer also says it has a few funny moments, so it isn't only action.

Ege Perfect — a bit of comedy and a bit of action! Let's watch that one.

Sude Great choice. I think we'll both enjoy it. Let's meet at seven.

Transcript · What Will Technology Be Like in 2050?

Deniz Our homework is to make predictions about technology in 2050. What do you think will change the most?

Zeynep I think artificial intelligence will help doctors diagnose illnesses much faster than today.

Deniz That's a good prediction. I think robots will do most of the housework too.

Zeynep Definitely! And I don't think people will drive cars themselves — cars will drive us instead.

Deniz Will people live on other planets, do you think?

Zeynep Maybe not by 2050, but I think scientists will discover a lot more about space by then.

Deniz I agree. I also think new inventions will help protect the environment.

Zeynep That's a great point. Let's add all these predictions to our project.
