Simple Present: Describing Film Events

1 · NOTICE

- A young robot **discovers** a hidden spaceship in the forest.
- The aliens **invade** Earth, and a small team of scientists **tries** to stop them.
- The main character **doesn't trust** the strange new invention at first.
- **Does** the hero **save** the city in the end? — Yes, he **does**.

Do these sentences describe things that happened once in the past, or events in the story that we describe as if they are happening now? What happens to the verb with 'the aliens' compared with 'the main character'?

2 · DISCOVER — A · COMPLETE THE RULE

Look at the Notice sentences again. Complete the rule with the words in the box.

Simple Present

-s/-es

doesn't

Does

1. We use the _____ to describe events and the plot of a film, as if they are happening now.
2. With he/she/it (a singular character), we add _____ to the verb.
3. The negative with he/she/it is _____ + base verb.
4. In a question with he/she/it, we start with _____ + subject + base verb.

B Build sentences

Use the cues to write true sentences describing a film plot. Look at the example first.

e.g.

a young robot

discover

a hidden spaceship

A young robot discovers a hidden spaceship.

1. the aliens invade Earth

2. the main character not / trust the strange invention

3. ? / the hero save the city

4. the scientists build a new device

5. ? / the crew escape from the alien ship

C Your turn

Think of a film you know well. Write four sentences in the Simple Present describing its plot and main character.

The film is about...

The main character...

In the end, the hero...

The film doesn't...

RULE

We use the Simple Present to describe the plot and events of a film, as if they are happening now. Add -s/-es to the verb with he/she/it (a singular character). Negative: doesn't + base verb. Question: Does + subject + base verb?

TR Film konusunu (olay örgüsünü) anlatırken, sanki şu anda oluyormuş gibi Geniş Zaman (Simple Present) kullanılır. He/she/it (tekil karakter) ile fiile -s/-es eklenir. Olumsuzda 'doesn't', soruda 'Does' öznenin önce gelir.

When?

We use this to describe a film's plot, events, or what a character does in the story.

TR Bir filmin konusunu, olaylarını veya bir karakterin ne yaptığını anlatırken kullanırız.

POSITIVE	NEGATIVE	QUESTION	SHORT ANSWERS
A robot discovers a hidden spaceship. The aliens invade Earth.	The main character doesn't trust the invention. The crew don't escape at first.	Does the hero save the city? Do the scientists build a new device?	Yes, he does. / No, he doesn't. Yes, they do. / No, they don't.
X WRONG	✓ RIGHT	WHY?	
The robot discover a spaceship.	The robot discovers a spaceship.	Add -s to the verb with he/she/it (a singular character). TR He/she/it (tekil karakter) ile fiile -s eklenir.	
Does the hero saves the city?	Does the hero save the city?	After 'does', use the base verb — no -s. TR Does'tan sonra fiil yalın hâlde kullanılır, -s almaz.	

1 Choose the correct option.

Simple Future (will): Predictions about Technology

1 · NOTICE

- By 2050, robots **will** do most of the housework at home.
- I think artificial intelligence **will** help doctors diagnose illnesses faster.
- Cars **won't** need drivers in fifty years' time.
- **Will** people live on other planets one day? — I think they **will**.

Which word do we use before the verb to talk about the future? How do we make it negative and a question? Does the verb change for he/she/it?

2 · DISCOVER — A · COMPLETE THE RULE

Look at the Notice sentences again. Complete the rule with the words in the box.

will won't Will base verb

1. We use ' _____ ' + base verb to make predictions about the future.
2. The negative form is ' _____ ', for things we don't expect to happen.
3. In a question, ' _____ ' comes before the subject.
4. After will/won't, the verb stays in its _____ (no -s, no 'to').

B Build sentences

Use the cues to write predictions about the future with will/won't. Look at the example first.

e.g. robots do most of the housework by 2050

Robots will do most of the housework by 2050.

1. artificial intelligence help doctors diagnose illnesses faster

2. cars not / need drivers in fifty years

3. ? / people live on other planets one day

4. scientists discover new forms of clean energy

5. ? / everyone have a personal robot at home

C Your turn

Write three predictions with will/won't about technology in fifty years' time.

In fifty years, people will... I think robots will... Cars won't...

RULE

We use 'will' to make predictions about the future and to express what the speaker believes, expects or guesses will happen. Negative: won't. Question: Will + subject + base verb? Always use the base verb after will/won't, even with he/she/it.

TR 'Will' gelecekle ilgili tahminlerde, konuşmacının inandığı veya beklediği şeyleri, görüş ve tahminlerini anlatmak için kullanılır. Olumsuzda 'won't', soruda 'will' özneden önce gelir. Will'den sonra fiilin yalın hâli kullanılır, he/she/it ile bile -s almaz.

When?

We use this to make predictions about future technology, inventions and events.

TR Gelecekteki teknoloji, icatlar ve olaylar hakkında tahminde bulunurken kullanırız.

POSITIVE	NEGATIVE	QUESTION	SHORT ANSWERS
Robots will do most of the housework.	Cars won't need drivers in the future.	Will people live on other planets?	Yes, they will. / No, they won't.
She will invent something amazing one day.	People won't use paper books very much.	Will robots replace teachers?	Yes, I think so. / No, I don't think so.

X WRONG	✓ RIGHT	WHY?
Robots will to do the housework.	Robots will do the housework.	Don't use 'to' after will. TR Will'den sonra 'to' gelmez.
She wills discover a new planet.	She will discover a new planet.	Will never takes -s, even with he/she/it. TR Will, he/she/it ile de değişmez, -s almaz.

5 Choose the correct option.

1 Before you read

Make predictions before you read.

1. Look at the title. What genre do you think this film is?
2. Guess: what might happen in a film called 'Attack of the Robots'?

Film Review: Attack of the Robots

- 1 'Attack of the Robots' is a new science fiction film, and it is already one of the most popular films of the year. If you enjoy space adventures with exciting special effects, this film is definitely for you.
- 2 The plot follows a young engineer named Mira, who discovers a hidden spaceship in an old factory. Inside, she finds a group of friendly robots who warn her about an alien invasion that is coming to Earth. Mira doesn't trust the robots at first, but she soon realises they need her help.
- 3 Together, Mira and the robots build a new device that can stop the aliens. The special effects in the invasion scenes are incredible — the alien ships look completely real, and the futuristic city looks amazing on the big screen. The film also has a few funny moments, so it isn't only action and drama; it has a little comedy too.
- 4 The main character, Mira, is brave and clever, and the robot characters are surprisingly funny. My favourite character is a small robot called Ziggy, who makes the audience laugh in almost every scene, even during the most dangerous parts of the story.
- 5 Does the film have a happy ending? I won't tell you exactly what happens, but I will say this: 'Attack of the Robots' is an exciting, funny and futuristic film that both teenagers and adults will enjoy. I give it four stars out of five!

1. What do you already know about Türkiye's space activities?

2. Guess: what kinds of goals might a national space programme have?

Türkiye's Journey to Space

- 1 In recent years, Türkiye has taken exciting steps into space science and technology. The country now has its own National Space Programme, with clear goals for the future of Turkish space exploration.
- 2 One of the programme's aims is to send more Turkish satellites into orbit to improve communication, weather prediction and agriculture across the country. Engineers and scientists are working on new devices and futuristic technology that will make these satellites smarter and more efficient.
- 3 The programme also has bigger dreams. Officials say that Türkiye will develop its own spaceport in the coming years, and that Turkish astronauts will take part in future international space missions. Some experts predict that within a few decades, Türkiye will also contribute to missions that explore the Moon and beyond.
- 4 Young people play an important part in this journey too. Universities and technology centres across Türkiye now offer programmes where students can study robotics, artificial intelligence and space engineering. Many students dream of becoming the scientists who will discover new technology for future space missions.
- 5 Nobody knows exactly what the future will bring, but one thing is clear: Türkiye's space journey is only just beginning. As one young engineer said in an interview, 'In fifty years, I think our inventions will help people travel further into space than we ever imagined.'

S1 Pitch Your Own Film

Pairs · 10–15 dk

Invent your own film (any genre). Describe its plot, main character and genre to your partner using the Simple Present, as if you are pitching the idea to a film company.

My film is a [genre] about...

The main character discovers/finds/builds...

In the end, the hero...

Does that sound interesting?

1. Individually, plan a short film idea: genre, main character, and 3–4 plot events.
2. Take turns pitching your film idea to your partner using the Simple Present.
3. Your partner asks at least 2 questions about the plot.
4. Swap roles, then find a new partner and pitch again.
5. Vote as a class on the most original film idea.

S2 Predictions for the Future

Small groups · 15–20 dk

In small groups, discuss and agree on three predictions about technology or life in fifty years' time, then present and defend your predictions to the class.

I think ... will/won't happen because...

Do you agree that...?

I'm not sure I agree. I think...

By 2075, people will probably...

1. In groups of 3–4, brainstorm 5–6 possible predictions about the future.
2. Discuss each idea and choose the group's top three predictions.
3. Prepare one sentence with 'will/won't' for each prediction, with a reason.
4. Present your three predictions to another group or the whole class.
5. Listen to another group's predictions and say if you agree or disagree.
