## GRAMMAR LESSON · PAST MODALS

# Past Deduction: Must have / Can't have

must have done, can't have done — being sure about the past.

Geçmişe Yönelik Çıkarım

## QUICK UNDERSTANDING

Geçmişte olmuş bir şey hakkında elimizdeki kanıtlara bakarak **çıkarım/tahmin** yaparken must have, can't have ve couldn't have + V3 (past participle) yapılarını kullanırız. Bunlar geçmiş zamanı değil, o geçmiş olay hakkındaki **şu anki kesinlik derecemizi** anlatır — "...mış olmalı", "...mış olamaz" gibi.

## The Structure

### Formula

**KESİN OLUMLU ÇIKARIM: Subject + MUST + HAVE + V3**

**İMKÂNSIZ / KESİN OLUMSUZ ÇIKARIM: Subject + CAN'T/COULDN'T + HAVE + V3**

Örnek: The lights are off — they must have gone out.

Örnek: She can't have finished already — she only started an hour ago.

**Not:** Olumsuz kesin çıkarım için "mustn't have" DEĞİL, "can't have / couldn't have" kullanılır — bu, İngilizcenin kendi içindeki bir boşluktur (mustn't have gramer olarak var değildir bu anlamda).

### Affirmative / Negative / Question

| KESİN OLUMLU                                              | KESİN OLUMSUZ / İMKÂNSIZ                                          | BELIRSIZ SORU (RETORİK)                              |
|-----------------------------------------------------------|-------------------------------------------------------------------|------------------------------------------------------|
| Subject + must + have + V3<br>He must have lost his keys. | Subject + can't/couldn't + have + V3<br>They can't have left yet. | How could he have known?<br>Where can she have gone? |

### Word Order

Özne — must/can't/couldn't — have — V3 (past participle). "have" hiçbir zaman düşmez, modal ile V3 arasında sabit kalır.

- They **must have taken** a taxi. — Muhtemelen taksiye binmişlerdir.
- She **can't have seen** us; she didn't wave. — Bizi görmüş olamaz; el sallamadı.

## How It Works

### When do we use it?

- **must have + V3**: geçmişte olduğuna neredeyse kesin şekilde eminsen — She must have left already; her coat is gone.
- **can't have / couldn't have + V3**: geçmişte olmasının imkânsız/mantıksız olduğunu düşünüyorsan — He can't have forgotten; I reminded him twice.
- **might/may/could have + V3**: geçmişte olmuş olabileceğini ama emin olmadığını belirtmek için (bu konu genelde ayrı bir başlıkta işlenir, ama karşılaştırma için önemlidir) — She might have missed the bus.
- **Kanıta dayalı, mantık yürüterek yapılan çıkarımlarda kullanılır** — gerçek bir olayı bildirmek için değil, o olay hakkındaki tahminini/emini oluşturanı anlatmak için.

### When DON'T we use it?

**mustn't have şeklinde bir yapı KULLANMA** — geçmişe yönelik olumsuz kesin çıkarım için mustn't have değil, can't have/couldn't have kullanılır.

✗ He mustn't have known about it. → ✓ He can't have known about it.

**must have + V3'ü zorunluluk ("yapmak zorundaydı") anlamıyla KARIŞTIRMA** — bu yapı zorunluluk değil, çıkarım/tahmin anlatır: "He must have left" = "gitmiş olmalı" (tahmin), "He had to leave" = "gitmek zorundaydı" (zorunluluk).

### Short Answers

**Hızlı kural:** must have + V3 → "...mış olmalı" (yüksek ihtimal). can't have / couldn't have + V3 → "...mış olamaz" (imkânsız). mustn't have DİYE bir çıkarım yapısı YOKTUR — olumsuzda her zaman can't/couldn't kullanılır.

### Türkçe Mantiğı

#### Zihninde şu sırayla ilerle:

TÜRKÇEDE NE DEMEK İSTİYORUM? → "Işıklar açık, evde olmalı." → BU GEÇMİŞTE OLAN BİR ŞEY HAKKINDA MI ÇIKARIM YAPIYORUM? → Evet, ışıkları o yakmıştı (geçmişte oldu), şimdi sonucundan çıkarım yapıyorum → NE KADAR EMİNİM? → Neredeyse kesin eminim → must → HANGİ YAPI? → must + have + V3 → CÜMLE → "He must have come home."

#### Şimdi imkânsız bir ihtimal için:

TÜRKÇEDE NE DEMEK İSTİYORUM? → "O sınavı geçmiş olamaz, hiç çalışmadı." → BU İMKÂNSIZ MI? → Evet, elimdeki kanıtlara göre imkânsız → HANGİ YAPI? → can't have / couldn't have + V3 → CÜMLE → "He can't have passed the exam."

## Examples

### MUST HAVE — KESİN OLUMLU ÇIKARIM

- The ground is wet; it must have rained last night. — Zemin ıslak; dün gece yağmur yağmış olmalı.
- She isn't answering her phone; she must have gone to bed early. — Telefonuna bakmıyor; muhtemelen erken yatmıştır.
- Someone must have taken my umbrella by mistake. — Birisi yanlışlıkla şemsiyemi almış olmalı.
- You must have worked really hard to get that score. — O puanı almak için gerçekten çok çalışmış olmalısın.

### CAN'T HAVE / COULDN'T HAVE — İMKÂNSIZ ÇIKARIM

- He can't have finished the whole book in one day. — Bütün kitabı bir günde bitirmiş olamaz.
- She couldn't have said that; it's not like her at all. — Bunu söylemiş olamaz; ona hiç benzemiyor.
- They can't have arrived already — the flight lands in an hour. — Çoktan varmış olamazlar — uçak bir saate iniyor.
- You couldn't have seen him yesterday; he was in another city. — Onu dün görmüş olamazsın; başka bir şehirdeydi.

### KESİNLİK DERECESESİ KARŞILAŞTIRMASI

- He must have left already. (neredeyse kesin) — Çoktan çıkmış olmalı.
- He might have left already. (belki, emin değilim) — Belki çoktan çıkmıştır.
- He can't have left already. (imkânsız, kesin değil) — Çoktan çıkmış olamaz.
- Why didn't you call me? — I must have lost your number. — Neden beni aramadın? — Numaranı kaybetmiş olmalıyım.

## Compare & Notice

### Compare With

| must have + V3                                                                     | might/may have + V3                                                                         |
|------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|
| Kanıtlara dayanarak neredeyse kesin bir sonuca vardığını gösterir. "...mış olmalı" | Aynı olay hakkında emin olmadığını, sadece bir ihtimal olduğunu gösterir. "...mış olabilir" |
| The car won't start — the battery must have died.                                  | The car won't start — the battery might have died.                                          |

### Karar Şeması (Decision Guide)

İmkânsız ↔ Kesin

#### can't/couldn't have + V3 ←— might/may/could have + V3 →— must have + V3

Üçü de GEÇMİŞ bir olay hakkında ŞİMDİKİ kesinlik derecesini anlatır: soldan sağa "kesinlikle olmadı"dan "kesinlikle oldu"ya doğru bir yelpaze oluşturur.

## Common Mistakes

|                                                                                                                                                                         |                                          |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------|
| ✗ He mustn't have known about the meeting.                                                                                                                              | ✓ He can't have known about the meeting. |
| <b>WHY?</b> Geçmişe yönelik kesin olumsuz çıkarım için "mustn't have" değil, "can't have / couldn't have" kullanılır — mustn't have bu anlamda İngilizcede kullanılmaz. |                                          |
| ✗ She must has forgotten her umbrella.                                                                                                                                  | ✓ She must have forgotten her umbrella.  |
| <b>WHY?</b> Modalden sonra gelen "have" hiçbir zaman özneye göre çekimlenmez (has/had olmaz); her zaman yalın "have" kalır.                                             |                                          |
| ✗ They must have go home early.                                                                                                                                         | ✓ They must have gone home early.        |
| <b>WHY?</b> have'den sonra fiilin yalın hâli değil, V3 (past participle) formu gelmelidir: have GONE, have go değil.                                                    |                                          |

✗ "He must have left" cümlesi "gitmek zorundaydı" anlamına gelir.

✓ "He must have left" = "gitmiş olmalı" (bir çıkarım/tahmin); zorunluluk anlatmak için "He had to leave" kullanılır.

**WHY?** must have + V3 hiçbir zaman geçmişteki bir zorunluluğu anlatmaz — sadece şimdiki bir çıkarımı/tahmini anlatır; geçmiş zorunluluk için had to kullanılır.

✗ He can't left the office before 6.

✓ He can't have left the office before 6.

**WHY?** "have" atlanmış — can't have + V3 kalıbında "have" mutlaka bulunmalıdır, yoksa geçmişe yönelik çıkarım anlamı kaybolur.
