

THEME 8 · B1+/B2

Crime in Society

8A Cyberspace: A Bandit Territory — expressing free choice, giving information briefly, disapproving of an action

8B Poetic Justice — cybercrime and justice, national/moral/cultural values

Warm-up

Look at the title: Crime in Society. What do you think we will talk about in this theme?
Tell your partner two ideas.

VOCABULARY

New words

20 target words

cybercrime

n.

siber suç

Cybercrime now costs the world economy far more than traditional theft.

hacker

n.

bilgisayar korsanı

A hacker broke into the company's servers and stole customer records.

phishing

n.

oltalama (phishing)

The phishing email looked exactly like a real message from her bank.

scam

n.

dolandırıcılık, hile

He nearly fell for a scam promising a free holiday.

identity theft

n. phrase

kimlik hırsızlığı

Identity theft can take months to sort out once your details have been stolen.

data breach

n. phrase

veri ihlali

The data breach exposed the passwords of millions of users overnight.

malware

n.

kötü amaçlı yazılım

Opening the attachment installed malware on his laptop without him noticing.

ransomware

n.

fidye yazılımı

The hospital's computer system was frozen by ransomware for three days.

two-factor authentication

n. phrase

iki adımlı doğrulama

Even with your stolen password, two-factor authentication can stop a hacker getting in.

password manager

n. phrase

parola yöneticisi

A password manager means you never have to remember dozens of passwords yourself.

encryption

n.

şifreleme

Strong encryption keeps your messages private, even if someone intercepts them.

cyberbullying

n.

siber zorbalık

Cyberbullying can follow a victim home and continue at any hour of the day.

whistleblower

n.

muhbir, ihbarcı

The whistleblower revealed that the company had hidden the data breach for months.

verdict

n.

hüküm, karar

The court's verdict finally gave the victims a sense of justice.

accountability

n.

hesap verebilirlik

Real accountability means admitting a mistake, not just apologising in public.

loophole

n.

kanun boşluğu, açık

The fraudster found a legal loophole and avoided punishment for years.

fall victim to

idiom, v. phrase

kurbanı olmak, mağdur olmak

Even experienced internet users sometimes fall victim to a convincing scam.

bring someone to justice

idiom, v. phrase

adalete teslim etmek

It took investigators two years to bring the hacking group to justice.

get away with

phr. v. (transitive)

yanına kâr kalmak, cezasız kalmak

The scammer thought he could get away with it, but the bank traced the transfer.

cover your tracks

idiom

izini kaybettirmek

Skilled hackers know how to cover their tracks so investigators can't trace them.

Quick game · What's the word?

“izini kaybettirmek”

a cover your tracks

b password manager

c hacker

Quick game · What's the word?

“hesap verebilirlik”

a accountability

b loophole

c malware

Quick game · What's the word?

“adalete teslim etmek”

a

bring someone to
justice

b

cybercrime

c

loophole

Quick game · What's the word?

“kurbanı olmak, mağdur olmak”

a hacker

b loophole

c fall victim to

Quick game · What's the word?

“parola yöneticisi”

a password manager

b ransomware

c cyberbullying

Quick game · What's the word?

“hüküm, karar”

a bring someone to
justice

b loophole

c verdict

GRAMMAR

Expressing Free Choice: Whoever, Whatever, Whichever, No Matter...

Notice

Whoever created that phishing email clearly wanted to trick people into giving away their passwords.

You can choose **whichever** password manager you trust most — the important thing is that you use one.

No matter what a scammer promises you online, never share your bank details by email.

Whatever method hackers use, a strong firewall and common sense can stop most attacks.

Which words let you talk about any person, thing or choice at all, without limiting it to one specific one?

Complete the rule

Look at the Notice sentences again. Complete the rule with the words in the box.

any person

any thing

any one you choose

it makes no difference

Complete the rule

Whoever means _____.

✓ any person

Complete the rule

Whatever means _____.

✓ any thing

Complete the rule

Whichever means _____, usually from a limited set of options.

✓ **any one you choose**

Complete the rule

No matter what/who/which means _____ — the result stays the same.

✓ it makes no difference

The rule

Whoever, whatever and whichever mean 'any person/thing/one you choose', without limiting it to one specific option. No matter who/what/which have the same meaning: 'it makes no difference which one'.

TR Whoever (kim olursa olsun), whatever (ne olursa olsun), whichever (hangisini seçerseniz seçin) ve no matter who/what/which (kim/ne/hangisi olursa olsun) ifadeleri, belirli bir kişi, şey ya da seçenekle sınırlı kalmadan 'her kim/her ne/hangisi olursa olsun' anlamı vermek için kullanılır.

When? We use these expressions when a rule or warning applies to everyone/everything, or when there is free choice between several options — especially in online-safety advice.

TR Bir kuralın ya da uyarının herkes/her şey için geçerli olduğunu vurgularken, ya da birden fazla seçenek arasında serbest seçim olduğunu belirtirken kullanılır — özellikle çevrimiçi güvenlik tavsiyelerinde.

Build sentences · Example

you + **can install / whichever antivirus program** + **you prefer**

You can install whichever antivirus program you prefer.

Build sentences

the police

+

will investigate / whoever

+

is behind the data breach

The police will investigate whoever is behind the data breach.

Build sentences

no matter what / a stranger online / promise you + never / send money

No matter what a stranger online promises you, never send money.

Build sentences

you + **can report the scam / to whichever** +
authority handles cybercrime in your country

You can report the scam to whichever authority handles cybercrime in your country.

Build sentences

whatever / password / you choose

+

make it strong and unique

Whatever password you choose, make it strong and unique.

Build sentences

? / whoever / send / this phishing email + know your email address

Does whoever sent this phishing email know your email address?

Your turn

Write four sentences about online safety using whoever, whatever, whichever and no matter what/who.

Whoever...

Whatever...

You can choose whichever...

No matter what...

Form

POSITIVE

Whoever reported the scam did the right thing.
You can choose whichever browser you like, as long as you keep it updated.

NEGATIVE

No matter what he says, don't trust an unexpected money request.
Whatever excuse a scammer gives, it doesn't make the request safe.

QUESTION

Whichever service will you use to report the fraud?
Does it matter whoever sent the message?

SHORT ANSWERS

It doesn't matter — no matter who it is, report it.
Whichever one — they all work.

Error detective

Whoever is he, don't give him your password.

a Correct

b Incorrect

✓ **Whoever he is, don't give him your password.**

Error detective

You can use whatever password manager, it doesn't strong.

a Correct

b Incorrect

✓ You can use whatever password manager you like, as long as it's strong.

Error detective

No matter what does he promise, ignore it.

a Correct

b Incorrect

✓ **No matter what he promises, ignore it.**

A · Choose the correct option.

_____ shares your password with a stranger online is taking a big risk.

a Whoever

b Whatever

c Whichever

A · Choose the correct option.

You can report the incident to _____ department deals with cybercrime at your school.

a whoever

b whichever

c whatever

A · Choose the correct option.

_____ method scammers use, staying alert is the best protection.

a Whoever

b Whatever

c Which

B · Complete with the correct form.

_____ (no matter what) a website promises you, never enter your card details on an unsecured page.

✓ **No matter what**

B · Complete with the correct form.

You can choose _____ (whichever) antivirus program fits your budget.

✓ **whichever**

B · Complete with the correct form.

_____ (whoever) posted that fake giveaway is trying to steal personal information.

✓ **Whoever**

C · Judge the sentence.

Whoever is he, he shouldn't ask for your bank PIN.

a Correct

b Incorrect

✓ **Whoever he is, he shouldn't ask for your bank PIN.**

C · Judge the sentence.

No matter what happens, always report suspicious messages to an adult or the authorities.

a Correct

b Incorrect

C · Judge the sentence.

You can use whatever device do you want to check your accounts safely.

a Correct

b Incorrect

✓ **You can use whatever device you want to check your accounts safely.**

Dialogue · Complete with a free-choice expression.

A: _____ (no matter who) contacts you, never share your one-time password by phone.

✓ No matter who

Dialogue · Complete with a free-choice expression.

B: Good advice — I'll report it to _____ (whichever) service sent the message.

✓ **whichever**

Dialogue · Reorder the sentence.

matter / what / says / no / he / don't / reply

reply

he

says,

don't

matter

no

what

•

✓ **No matter what he says, don't reply.**

GRAMMAR

Expressions of Disapproval: Should(n't) Have, Ought to Have, It's Wrong To, I Don't Approve Of

Notice

The company **shouldn't have** ignored so many warnings before the data breach happened.

He **ought to have** reported the scam the moment he noticed it, not a week later.

It's wrong to read someone else's private messages without their permission.

I don't approve of people who share other students' photos online without asking first.

Which expressions criticise a past action that already happened, and which express disapproval of behaviour in general?

Complete the rule

Complete the rule with the words in the box.

a mistake in the past that can't be changed now

in general, at any time

a more formal alternative to shouldn't have

Complete the rule

Should have / shouldn't have + past participle criticises _____

- **✓ a mistake in the past that can't be changed now**

Complete the rule

Ought to have + past participle is _____.

✓ a more formal alternative to shouldn't have

Complete the rule

It's wrong to / I don't approve of + verb criticise behaviour

_____ •

✓ in general, at any time

The rule

Should have / shouldn't have + past participle criticises a past mistake that can't be undone. Ought to have + past participle is a more formal alternative with the same meaning. It's wrong to + verb and I don't approve of + verb-ing express general disapproval of behaviour.

TR Should have / shouldn't have + V3 (geçmiş zaman ortacı), geçmişte yapılan ya da yapılmayan bir hatayı eleştirmek için kullanılır ve artık değiştirilemez. Ought to have + V3, 'shouldn't have' ile aynı anlamda ama daha resmi bir alternatiftir. It's wrong to + fiil ve I don't approve of + fiil-ing ise genel olarak bir davranışı onaylamadığımızı belirtmek için kullanılır.

When? Use should(n't) have / ought to have to criticise a specific past mistake; use it's wrong to / I don't approve of to criticise unethical behaviour in general — especially when discussing cybercrime and online ethics.

TR Geçmişte olan bir hatayı eleştirirken should(n't) have / ought to have; genel olarak etik olmayan bir davranışı eleştirirken it's wrong to / I don't approve of kullanırız — özellikle siber suç ve çevrimiçi etik konularında.

Build sentences · Example

the school

+

shouldn't have / ignore

+

the cyberbullying reports

The school shouldn't have ignored the cyberbullying reports.

Build sentences

the bank

+

ought to have / warn

+

customers about the phishing emails

The bank ought to have warned customers about the phishing emails.

Build sentences

it's wrong to / share

+

someone's private photos without permission

It's wrong to share someone's private photos without permission.

Build sentences

I / don't approve of / people who / spread + fake news online

I don't approve of people who spread fake news online.

Build sentences

they

+

shouldn't have / click

+

on that suspicious link

They shouldn't have clicked on that suspicious link.

Build sentences

? / he / ought to have / report + the hacker to the police

Ought he to have reported the hacker to the police?

Your turn

Write four sentences disapproving of unethical online behaviour, using should(n't) have, ought to have, it's wrong to, and I don't approve of.

He shouldn't have...

They ought to have...

It's wrong to...

I don't approve of...

Form

POSITIVE

He should have changed his password sooner.
It's wrong to hack into someone's account, even as a joke.

NEGATIVE

She shouldn't have opened that attachment.
I don't approve of people who spy on their friends' accounts.

QUESTION

Should the company have informed its customers earlier?
Ought they to have reported the fraud immediately?

SHORT ANSWERS

Yes, they should have. / No, they shouldn't have.
Yes, they ought to. / No, they oughtn't to.

Error detective

He should have go to the police.

a Correct

b Incorrect

✓ He should have gone to the police.

Error detective

It's wrong to shared private information.

a Correct

b Incorrect

✓ **It's wrong to share private information.**

Error detective

I don't approve to people who bully others online.

a Correct

b Incorrect

✓ **I don't approve of people who bully others online.**

A · Choose the correct option.

She _____ her card details with that website — it turned out to be a scam.

a shouldn't have shared

b don't approve of sharing

c is wrong to share

A · Choose the correct option.

_____ read your classmate's private messages without asking.

a It's wrong to

b You shouldn't approve

c Ought you

A · Choose the correct option.

I really _____ people who post other people's photos without permission.

a don't approve of

b shouldn't have approved

c wrong to approve

B · Complete with the correct form.

The company _____ (ought to / warn) users sooner about the data breach.

✓ **ought to have warned**

B · Complete with the correct form.

It's wrong _____ (to / read) someone's emails without permission.

✓ to read

B · Complete with the correct form.

He _____ (shouldn't / click) on that link — now his account is hacked.

✓ **shouldn't have clicked**

C · Judge the sentence.

He should have reported the hacker sooner.

a Correct

b Incorrect

C · Judge the sentence.

It's wrong to sharing someone's private photos.

a Correct

b Incorrect

✓ **It's wrong to share someone's private photos.**

C · Judge the sentence.

I don't approve to cyberbullying in any form.

a Correct

b Incorrect

✓ **I don't approve of cyberbullying in any form.**

Dialogue · Complete with the correct form.

A: Did you hear? Someone _____ (shouldn't / open) that email — now the whole office computer is infected.

✓ shouldn't have opened

Dialogue · Complete with the correct form.

B: I agree. _____ (it's wrong to) open attachments from unknown senders.

✓ It's wrong to

Dialogue · Reorder the sentence.

of / cyberbullying / don't / any / form / I / in / approve

form

approve

don't

of

in

I

cyberbullying

any

•

✓ **I don't approve of cyberbullying in any form.**

READING

Bandits Without Borders

Before you read

1. What do you think the title 'Bandits Without Borders' might mean?
2. Have you or someone you know ever received a suspicious message online? What happened?

BANDITS WITHOUT BORDERS · 1 / 3

A century ago, a bandit needed a horse, a weapon and a lonely mountain road. Today's most successful criminals need none of these things — only a laptop, a stable internet connection and a convincing lie. Cybercrime has turned the whole planet into a kind of open territory, where a thief in one country can empty a stranger's bank account on the other side of the world without ever leaving their chair.

Because these crimes cross borders so easily, catching the people responsible is far harder than catching a bandit on a single road.

BANDITS WITHOUT BORDERS · 2 / 3

Many cybercriminals don't break into computers at all — they trick people into opening the door themselves. This is known as phishing: sending a message that looks like it comes from a bank, a delivery company or even a friend, designed to make the reader click a link or hand over a password. The most dangerous scams don't rely on clever code; they rely on urgency and fear, pushing victims to act before they stop to think.

BANDITS WITHOUT BORDERS · 3 / 3

Fighting back doesn't always require expensive software. Simple habits — using a different password for every account, thinking twice before clicking an unexpected link, and turning on two-factor authentication — stop the vast majority of attacks before they start. Cyberspace may feel like bandit territory, but every careful user makes it a little less lawless.

While you read

What is the main idea of the text?

a Cybercriminals always use highly advanced computer code.

b Modern cybercrime crosses borders easily and often relies on tricking people rather than complex hacking.

c Phishing emails are impossible to prevent.

While you read

Tricking someone into clicking a link or giving away a password by pretending to be a trusted sender is called _____.

✓ phishing

While you read

According to the text, what do the most dangerous scams rely on?

a expensive software

b urgency and fear

c weapons

While you read

According to the text, cybercrime is harder to stop than traditional crime partly because it crosses borders so easily.

a Correct

b Incorrect

While you read

The text suggests that using a different password for every account and turning on _____ can prevent most attacks.

✓ **two-factor authentication**

After you read

1. Which safety habit from the text do you already follow? Which one will you start?
2. Why do you think cybercriminals often target people's emotions rather than their computers?

READING

Justice in the Digital Age

Before you read

1. What do you think 'poetic justice' means? Can you think of an example from a film or story?
2. Do you think online crimes are punished as seriously as offline crimes? Why or why not?

JUSTICE IN THE DIGITAL AGE · 1 / 3

When a burglar breaks a window, the evidence is easy to see. When a hacker breaks into an account, the evidence is a string of invisible code, and that makes justice much harder to deliver. Courts around the world are now training specialist judges and detectives simply to keep up with crimes that didn't exist twenty years ago, from ransomware attacks on hospitals to the theft of millions of people's personal data in a single breach.

JUSTICE IN THE DIGITAL AGE · 2 / 3

Poetic justice — the idea that wrongdoers eventually get the punishment they deserve, often in a fitting or ironic way — has always fascinated storytellers. In the digital world, this sometimes happens by accident: a scammer's own device gets infected by the same malware they used on others, or a hacker is caught because they bragged about the crime online. Real justice, however, rarely arrives so neatly; most cybercriminals are never identified at all.

JUSTICE IN THE DIGITAL AGE · 3 / 3

That's why fairness in the digital age depends on more than punishment after the fact. Companies are expected to protect the data they collect, whistleblowers who expose wrongdoing deserve legal protection rather than punishment, and ordinary users need clear, simple laws they can actually understand. A just digital world isn't only about catching criminals — it's about building a system where trust is earned and protected in the first place.

While you read

What is the main idea of the text?

a Digital crime is always punished quickly and fairly.

b Delivering justice for digital crime is difficult, and fairness requires more than just catching criminals.

c Poetic justice always happens to cybercriminals.

While you read

The idea that wrongdoers eventually get a fitting or ironic punishment is called _____.

✓ poetic justice

While you read

According to the text, why is delivering justice for hacking often harder than for burglary?

a Hacking evidence is invisible code, unlike a broken window.

b Hacking is not actually against the law.

c Judges refuse to study new types of crime.

While you read

According to the text, most cybercriminals are eventually identified and punished.

a Correct

b Incorrect

✓ **According to the text, most cybercriminals are never identified at all.**

While you read

The text says people who expose wrongdoing, known as _____, deserve legal protection.

✓ **whistleblowers**

After you read

1. Why might 'poetic justice' happen more often in stories than in real life?
2. What responsibility do you think companies have to protect the data they collect from us?

LISTENING

The Suspicious Email

Before you listen

1. Predict: what kind of email do you think made Ece worried?

The Suspicious Email

Ses kaydı yakında — transkripti öğretmen okuyabilir.

While you listen

What did the suspicious email claim?

a That Ece won a prize

b That Ece's bank account was locked

c That Ece's phone was hacked

While you listen

Ece realised the email was fake because the sender's address

_____ •

✓ was spelled wrong

While you listen

Ece clicked the link in the email before realising it was a scam.

a Correct

b Incorrect

✓ **Ece almost clicked the link, but she noticed the mistake and didn't.**

While you listen

What does Burak say scammers hope people will do?

a

Read carefully before acting

b

Panic and click without thinking

c

Call the bank first

LISTENING

Know Your Rights Online

Before you listen

1. Predict: what three pieces of advice do you think Ms Aydın will give?

Know Your Rights Online

Ses kaydı yakında — transkripti öğretmen okuyabilir.

While you listen

What is the main purpose of Ms Aydın's talk?

a

To explain how hackers work

b

To advise students what to do if they experience cybercrime

c

To ban students from using the internet

While you listen

Ms Aydın advises students to keep _____ before blocking or deleting anything.

✓ the evidence

While you listen

According to the talk, reporting a scam is pointless because the criminal will never be caught.

a Correct

b Incorrect

✓ According to the talk, every report helps build a bigger picture and can help catch patterns of fraud.

While you listen

According to Ms Aydın, why is reporting 'the fair thing to do'?

a It guarantees a reward.

b Staying silent could let the scammer target someone else.

c It is required by school rules.

SPEAKING

Who's to Blame?

In pairs, discuss a scenario: a classmate lost money after clicking a fake prize link. Whose fault is it, and could it have been prevented? Use disapproval expressions (shouldn't have, it's wrong to) and free-choice expressions (whoever, whatever, no matter what) where natural.

SPEAKING

Presenting an Online Safety Rule

Prepare a two-minute talk about one type of cybercrime (such as phishing, ransomware or cyberbullying) and one online-safety rule connected to it. Explain what the crime involves, why it matters, and what people should or shouldn't do to stay safe.

WRITING

A Cybercrime Awareness Article

Write a short magazine article warning teenage readers about one type of cybercrime (phishing, cyberbullying, identity theft, etc.). Start with a clear topic sentence, add at least three supporting sentences with details and examples, and finish with a concluding sentence giving advice.

WRITING

A Fair Verdict

Write a short opinion paragraph giving your view on how society should treat cybercriminals. Should punishments for cybercrime be as serious as for 'real-world' crime? Support your opinion with at least two reasons.

REVIEW

Exit ticket

Exit ticket

After clicking the link, she realised too late that it was a

_____ .

a phishing scam

b password manager

c whistleblower

Exit ticket

_____ sent this message is hoping you'll panic and click without thinking.

a Whoever

b Whatever

c Whichever

Exit ticket

You can use _____ (whichever) antivirus program you trust, as long as you keep it updated.

✓ whichever

Exit ticket

He _____ (shouldn't / share) his password with a stranger online.

✓ **shouldn't have shared**

Exit ticket

Which sentence correctly expresses general disapproval?

a

It's wrong to hack into someone's account.

b

It's wrong hacking into someone's account.

c

It's wrong to hacked into someone's account.

Exit ticket

No matter what does a scammer say, never share your one-time password.

a Correct

b Incorrect

✓ **No matter what a scammer says, never share your one-time password.**

Exit ticket

The company _____ (ought to / warn) customers sooner about the data breach.

✓ **ought to have warned**

Exit ticket

A message pretending to be from your bank, designed to steal your password, is called _____.

a a firewall

b phishing

c encryption

Exit ticket

Someone who exposes wrongdoing inside an organisation is called a _____.

✓ **whistleblower**

Exit ticket

Put the words in order.

him

what

any

send

matter

no

he

don't
