Nominal Clauses — İsim Cümleleri

Nominal (isim) cümleleri, bir cümlede **özne, nesne veya tümleç** görevini üstlenen yan cümleciklerdir. C1 düzeyi akademik yazımda cümlelere derinlik ve karmaşıklık katar. Türkçe'deki "-dığı, -acağı, -mesi" ekleri gibi işlev görür.

Nominal clause türleri

Tür	Yapı	Örnek
What clause	What + S + V	What concerns me most is the lack of transparency.

Tür	Yapı	Örnek
That clause	that + S + V	It is clear that action is needed .
The fact that	The fact that + S + V	The fact that no one was informed is troubling.
Whether clause	whether + S + V	The question is whether we can afford it .
How/Why clause	how/why + S + V	How the data was collected remains unclear.

Özne konumunda nominal clause

What clause — özne

What I find remarkable is her resilience.

What the data shows is deeply worrying.

What we need is a long-term solution.

That / whether — nesne

I believe **that the policy is flawed**.

She questioned **whether the data was reliable**.

He admitted **that he had been wrong**.

TIP — Cleft sentences ile güç

Nominal clause + cleft = C1 seviyesi güç:

Sade: "The timing matters most."

C1: "**What matters most** is the timing."

Sade: "Lack of funding caused the failure."

C1: "**What caused the failure** was the lack of funding."

Does Language Shape Thought?

What linguists have long debated is whether language shapes thought or merely expresses it — a question far more profound than it might initially appear.

The fact that different languages encode reality in fundamentally different ways **gives credence** to the hypothesis that language influences cognition. The linguist Benjamin Lee Whorf famously claimed that the Hopi language of the American Southwest has no words or grammatical forms that refer to time as English does — **what this implies** remains disputed, and later research by Ekkehart Malotki strongly challenged the claim. The Pirahã people of the Amazon speak a language that, according to the controversial research of Daniel Everett, appears to lack recursion entirely — **which would mean** they cannot embed one thought inside another.

What we take for granted — the assumption that language and thought are entirely separable processes — is precisely **what this research calls into question**. The **extent to which** language, culture, and cognition are intertwined

remains one of psychology's most genuinely **nuanced** and unresolved questions.

Some linguists argue the Sapir-Whorf hypothesis is dead, **predicated on** poor methodology. Others **bear out** weaker versions of it with careful experiments. **Whether** colour perception, spatial reasoning, or time orientation can be altered by language structure **remains to be established** definitively.

It goes without saying that **the fact that** we are even asking this question reveals something important: **what we believe** about the relationship between language and mind shapes everything else — our theories of education, consciousness, artificial intelligence, and cross-cultural understanding. **What is certain** is that the debate is far from over.

Exercises

- 1. a) What** — Nominal clause as subject: *What + clause + IS* (tekil fiil!) — 'the thing that matters most'
- 2. a) that** — The fact that + clause = nominal clause (the lying is the subject's fact)
- 3. a) so** — Substitution: *think so = I think she will come* (replaces entire clause)
- 4. a) not** — Substitution: *hope not = I hope there will not be problems*
- 5. a) has** — Ellipsis: 'has' (read the report too) — avoid repeating the full verb phrase
- 6. a) What** — What-clause as subject: 'What he said' = 'The thing he said' (singular)
- 7. c) to which** — The extent to which = ne ölçüde (formal nominal clause with preposition)
- 8. b) Whether** — Whether + clause as subject (yes/no alternative — formal)
- 9. c) is** — What-clause = TEKİL özne → IS (not are!)
- 10. b) did** — Ellipsis with inversion: *so + did + subject* (= her sister passed too)
- 11. a) fact** — The fact that... = formal nominal clause (established truth)
- 12. a) that** — told + that-clause (nominal clause as object of 'told')
- 13. a) What** — What-clause as subject: 'What we know' = 'The things we know'
- 14. a) to** — Ellipsis with infinitive: *try to* (= try to help) — omit 'help'
- 15. a) saying** — Fixed idiom: 'it goes without saying that...' = goes without + V-ing

Comprehension

- Whether language shapes thought or merely expresses it.
- According to controversial research, it may lack recursion — the ability to embed one thought inside another.
- The assumption that language and thought are entirely separable processes.
- e.g. 'What linguists have long debated' (subject) / 'What this implies' (subject) / 'What we take for granted' (subject) / 'What is certain' (subject)

Writing — örnek cevaplar

Görev 1 — Nominal clause alıştırmaları

What linguists have long debated is whether language shapes thought. The fact that some languages have no word for "blue" raises fascinating questions. Whether colour perception is truly universal or language-dependent remains contested. The extent to which our mother tongue limits our thinking is what researchers are only beginning to understand.

Görev 2 — Dil ve düşünce

What I find most compelling is the Sapir-Whorf hypothesis — and I believe so too, though cautiously. The fact that different languages encode time differently suggests that thought is not entirely universal. Whether our language constrains us or merely shapes us is a question I cannot answer with certainty. What I do believe is that learning multiple languages expands the mind.

Who Controls the Story?

Little did early internet pioneers know that the medium they were building with such idealism would become the 21st century's primary battlefield for truth. They believed they were creating the world's greatest library. **Seldom** in history **has** a technology been so rapidly repurposed for ends its creators never imagined.

No sooner had social media platforms achieved global dominance **than** their capacity for industrial-scale disinformation became frighteningly apparent. **Not only did** they amplify false and inflammatory content, **but** their algorithms actively and measurably **rewarded** it with greater reach.

Rarely has a technology so fundamentally reshaped the epistemological landscape of public life in such a short period. **Under no circumstances** should we accept, as some now seem tempted to, a world in which truth is merely a matter of opinion — where facts and fiction carry equal weight because both generate engagement.

Never before had the power to publish at scale been so widely distributed. This was supposed to democratise information. The outcome has been more complicated: a world where everyone can speak, but **seldom has** it been

harder to know what is true.

Not only is this a philosophical problem, **but** it represents a direct and measurable threat to democratic governance, public health, and social cohesion. **Little do** most people realise how thoroughly the information environment around them has been engineered to capture attention rather than to inform.

Tavizli (concessive) yapılar

Concessive yapılar bir karşı görüşü ya da engeli **kabul edip** yine de ana fikri savunmaya yarar: *Ne kadar zor olursa olsun, ... / Kabul etmek gerekir ki ..., ancak ...* C1 düzeyinde **although / despite** dışına çıkıp **however + sıfat, whatever, much as, granted (that)** gibi yapıları kullanmak, yazıya denge ve olgunluk katar.

Özet tablo

Yapı / Kural	Form	Anlam	Örnek
However + adj/adv	However + adjective/adverb + subject + verb	Ne kadar...olursa olsun — NO COMMA before 'however' here!	<i>However difficult the question may be, we must engage with it. / However confidently she speaks...</i>

Much as + subject + verb	Much as + subject + verb, main clause	Ne kadar...olsa da — literary, formal concession	<i>Much as I admire her commitment, I disagree with her methods.</i>
Granted (that)	Granted (that) + clause, main clause	Kabul ederek ama reddederek devam etme	<i>Granted that the evidence is limited, we should still take the risk seriously.</i>
Supposing / Assuming (that)	Supposing + Past Simple / that + clause	Hayali durumu varsaymak — 'if' alternatifi	<i>Supposing you were right — what would that imply? / Assuming he refuses, what then?</i>

'However' = 'No matter how' (ne kadar olursa): 'However hard it is' = 'No matter how hard it is.' Bu farklı 'however' (=bununla birlikte)! | 'Much as' = literary/formal, sınav İngilizcesi. | 'Whoever' = 'any person who' (relative) veya 'no matter who' (concessive).

Örneklerle

🔥 However / No matter how

However hard she tried, she couldn't open it.
→ *Ne kadar uğraştıysa da açamadı.*

No matter how late it is, call me. → *Saat kaç olursa olsun beni ara.*

? Whatever / Whoever / Wherever

Whatever you decide, I'll support you. → *Ne karar verirsen ver, seni desteklerim.*

Wherever you go, take a map. → *Nereye gidersen git, harita al.*

Whoever calls, tell them I'm busy. → *Kim ararsa arasın, meşgul olduğumu söyle.*

👉 Much as / Granted / Admittedly

Much as I like him, I can't agree. → *Onu ne kadar sevsem de katılamam.*

Granted, the plan is risky, but it's our best option. → *Kabul, plan riskli; ama en iyi seçeneğimiz.*

Admittedly, the data is incomplete. → *Kabul etmek gerekir ki veriler eksik.*

IMPORTANT — İki farklı "however"

However, (virgüllü) = *Bununla birlikte: It was cheap. However, it broke quickly.*

However + sıfat/zarf (virgülsüz) = *Ne kadar ... olursa olsun: However cheap it is, I won't buy it.*

COMMON MISTAKE — Despite ile cümle

~~Despite it was raining, we went out.~~

Despite the rain / Despite the fact that it was raining / **Although** it was raining, we went out.

The Ship of Theseus and Personal Identity

The Ship of Theseus is one of philosophy's oldest puzzles: if every single plank of a ship is gradually replaced, is it still the same ship? **Whatever** your intuitive answer, the question has profound implications for our understanding of personal identity and consciousness.

Granted that many of the cells in our bodies are replaced over the years, are you genuinely the same person you were a decade ago? **However confidently** you might assert continuous identity across time, neuroscience increasingly challenges this certainty.

Much as we are attached to the idea of a fixed, stable, singular self that persists through time, accumulating evidence suggests that the self is better understood as a narrative construction — a story we tell about ourselves, moment by moment, to create the illusion of continuity. **Wherever** we go and **whatever** we experience, we carry this narrative with us, constantly revising it.

Supposing memory were entirely erased — every childhood experience, every relationship, every skill — would the surviving body be the same person? Most people intuitively say no. But **whoever** decides this question must grapple with what we mean by "same."

Even if we accept the continuity of physical matter, the philosophical puzzle remains. **Much as** we might prefer a neat answer, consciousness — its nature, its origins, its relationship to physical processes — remains what philosopher David Chalmers called "the hard problem." **However** sophisticated our neuroscience becomes, explaining why there is subjective experience at all is a question of a different order entirely.

Comprehension

1. If every plank of a ship is gradually replaced, is it still the same ship? — a thought experiment about identity and continuity.
2. Evidence suggests the self is a narrative construction — a story we tell ourselves to create an illusion of continuity.
3. Why is there subjective experience at all? Explaining why physical processes give rise to inner experience.
4. e.g. 'However confidently you might assert...' / 'Much as we are attached...' / 'Whatever your intuitive answer...' / 'Granted that our bodies replace cells...'

Grammar practice

2. ____ you do, don't tell her the secret. → **Whatever**
3. ____ as I respect your opinion, I think you're wrong. → **Much**
4. ____ the weather, the festival went ahead. → **Despite**

Writing — örnek cevaplar

Görev 1 — Concessive yapılar

However confidently you might assert your identity, the self may be more fluid than it appears. Whatever your intuitive answer to the Ship of Theseus puzzle, the philosophical implications are profound. Much as we are attached to the idea of a fixed self, neuroscience suggests otherwise.

Görev 2 — Kimlik ve bilinç

However difficult the question of personal identity may seem, it is one we cannot avoid. Whatever choices we make define who we become. Much as I believe in individual agency, I acknowledge that circumstances shape us profoundly. Granted that our bodies replace every cell over seven years, we still feel continuous — and that feeling is what matters.

Stance Adverbials — Tutum Zarfları

Stance adverbials, yazarın veya konuşmacının bir bilgiye ya da iddialara **tutumunu** gösterir. C1 düzeyi akademik ve profesyonel dilde bu zarflar çok önemlidir. "Bu kesinlikle doğrudur" yerine "Muhtemelen, tartışmalı olarak, özellikle dikkat çekici biçimde..." gibi nüanslı ifadeler kullanılır.

Kategori tablosu

Kategori	Zarflar	Kullanım
Epistemic (ne kadar emin?)	arguably · arguably · evidently · apparently · presumably · seemingly	Düşünceye ne kadar kesin baktığını gösterir

Kategori	Zarflar	Kullanım
Evaluative (değerlendirme)	notably · strikingly · remarkably · interestingly · surprisingly	Özellikle dikkat çekici bulduğunu vurgular
Style (nasıl söylüyorsun?)	frankly · honestly · bluntly · in all honesty	Konuşma tarzını belirtir

Detaylı örnekler

Zarf	Anlam	Örnek cümle
Arguably	tartışmalı ama savunulabilir	Arguably , this is the greatest novel of the 20th century.
Evidently	kanıttan açık	Evidently , the policy has failed to achieve its goals.
Notably	özellikle dikkat çekici	Notably , no women were included in the original study.
Strikingly	çarpıcı biçimde	Strikingly , the results differed across all three groups.
Remarkably	şaşırtıcı biçimde	Remarkably , the patient recovered within a week.
Apparently	görünüşe göre	Apparently , the funding was withdrawn without notice.

TIP — Konumları

Çoğu stance adverbial cümle başında veya ortasında virgülle ayrılır:

Arguably, this approach is flawed.

This approach, **arguably**, is flawed.

This approach is, **arguably**, the most effective.

The Attention Economy

Admittedly, the internet has delivered extraordinary benefits: democratised access to knowledge, unprecedented global communication, and tools for collaboration that earlier generations could not have imagined. Access to information has, **arguably**, never been greater in human history.

Yet **worryingly**, the very infrastructure of the modern web has been engineered to exploit our cognitive vulnerabilities. **Notably**, most major platforms generate revenue not from the quality of information they host, but from the volume of time users spend scrolling, clicking, and reacting. **Paradoxically**, the tools that were supposed to democratise information have arguably concentrated epistemic power in fewer hands than ever before.

Critics **contend** that this attention-extraction model is structurally incompatible with healthy democratic discourse. Others **attribute** the problem not to the platforms themselves but to the failure of regulatory frameworks to keep pace with technological change.

Strikingly, some of the engineers who built these systems now **concede** that they did not fully anticipate — or in some cases, did not adequately consider — the societal consequences of designing for engagement above all else. They **posit** that a different value architecture — optimising for wellbeing or accuracy rather than attention — is possible, but that market incentives currently make it unlikely.

Admittedly, identifying the problem is far easier than solving it. What is required, most researchers **maintain**, is not the destruction of digital platforms, but their fundamental reorientation.

İ Görüş yazısı — gerçek bilgiler içerir, yorumlar yazara aittir.

2. What do many engineers now concede?

3. Find 4 stance adverbials in the text and explain what attitude/stance each expresses.

4. Find 3 advanced reporting verbs and explain the difference from 'said'.

Görev 1 — Stance adverbials

Admittedly, social media connects people across the world. Arguably, however, it has done more harm than good to public discourse. Paradoxically, the platforms designed to bring us together have deepened political divisions. Worryingly, algorithms prioritise engagement over accuracy.

Görev 2 — Gelişmiş bildirme fiilleri

Admittedly, technology has transformed education in remarkable ways. Arguably, access to information has never been greater. Notably, students in remote areas can now access world-class resources. Paradoxically, however, screen time appears to be reducing deep reading skills. Strikingly, young people report feeling more anxious despite being more connected.

Gerçek dışı geçmiş zaman: wish, I'd rather, it's time, as if

Bu yapıların ortak noktası, **gerçek olmayan ya da henüz gerçekleşmemiş** bir durumdan bahsederken zamanı bir adım geriye kaydırmalarıdır. Şimdiki bir durum için **Past Simple**, geçmişteki bir durum için **Past Perfect** kullanılır. Yani buradaki geçmiş zaman, *zamanı* değil *gerçek dışılığı* gösterir.

Özet tablo

Yapı / Kural	Form	Anlam	Örnek
I'd rather + subject + PS	I'd rather + subject + Past Simple (not present/infinitive)	Birinin bir şey yapmasını tercih etme	<i>I'd rather you came tomorrow. / I'd rather she didn't know about this yet.</i>
It's high time / It's about time	It's high time + subject + Past Simple	Gecikmeli zorunluluk – ŞİMDİ'yi kasteder ama Past Simple	<i>It's high time we addressed this. / It's about time he took responsibility.</i>
as if / as though + PS	as if/as though + Past Simple = contrary to present fact	Şimdiki gerçeğe uymayan benzetme	<i>He talks as if he were the only expert. / She acts as though she owned the place.</i>
as if / as though + PP	as if/as though + Past Perfect = contrary to past fact	Geçmişteki gerçeğe uymayan benzetme	<i>She looked as if she had seen a ghost. / He spoke as though he had prepared for years.</i>
wish + would (annoyance)	I wish + subject + would/wouldn't + V1	Birinin tekrarlayan davranışına sinirlilik veya değişim isteği	<i>I wish he would stop interrupting me. / I wish you wouldn't do that.</i>

! 'I'd rather + PS' (başkası için): 'I'd rather you CAME tomorrow.' (NOT 'come') | 'It's high time' + PS ama ŞİMDİKİ anlamda: 'It's high time she LEFT.' = she should leave now. | 'as if he were' (resmi; günlük dilde 'was' da kullanılır). | I wish + PP (geçmiş pişmanlık) ≠ I wish + PS (şimdiki hayali dilek).

Örneklerle

🌟 wish / if only

I **wish I had** more free time. → *Keşke daha fazla boş vaktim olsa. (şimdi)*

If only I **hadn't said** that! → *Keşke bunu söylemeseydim! (geçmiş)*

I **wish you would stop** shouting. → *Keşke bağırmanı bıraksan. (rahatsızlık)*

🙏 would rather / it's time

I'd rather **stay** at home tonight. → *Bu akşam evde kalmayı tercih ederim. (aynı özne → V1)*

I'd rather **you didn't tell** anyone. → *Kimseye söylememeni tercih ederim. (farklı özne → V2)*

It's high time we **left**. → *Artık gitme vaktimiz geldi de geçiyor.*

as if / as though

He talks **as if he knew** everything. → Her şeyi biliyormuş gibi konuşuyor. (bilmiyor)

You look **as if you've seen** a ghost. → Hayalet görmüş gibisin. (olabilir → gerçek zaman)

She acted **as though nothing had happened**. → Hiçbir şey olmamış gibi davrandı.

IMPORTANT — was mı were mı?

*I wish I **were** taller / as if he **were** the boss* — resmi ve sınav İngilizcesinde **were** tercih edilir; günlük konuşmada **was** da yaygındır ve yanlış sayılmaz. Ancak *If I were you* kalıbı sabittir.

COMMON MISTAKE — wish + would kendin için

~~I wish I would be rich.~~ → **I wish I were rich.**

wish + would başkasının davranışından şikâyet için kullanılır: **I wish he would listen.**

Kendine sor — pratik yap

I wish I _____ (live) closer to the sea.

I'd rather you _____ (not / smoke) in the car.

It's high time you _____ (get) a new phone.

She looked as if she _____ (not / sleep) for days.

Can We Be Held Responsible?

Philosophers have been arguing about free will for millennia, yet the debate feels no closer to resolution. It is as though they **had been walking** in circles for centuries without noticing.

Hard determinists argue that every thought, decision, and action is the inevitable product of prior physical causes — genes, neural architecture, upbringing, circumstance. **If this were true**, it would be as though we **had never genuinely chosen** anything at all. We would be, in effect, extraordinarily complex physical systems — nothing more.

It's high time philosophy engaged more seriously with what neuroscience has revealed: that, in some experiments, brain activity can predict a simple decision several seconds — in a 2008 study, up to about ten seconds — before we become consciously aware of "making" it. The implications are profound — and deeply unsettling.

Compatibilists **would rather** we reframed the question entirely. They argue that even if determinism is true, we can still meaningfully speak of free will — not as freedom from causation, but as freedom from coercion and mental illness. **I wish** this were simpler. But as **if to confirm** the complexity, every apparent answer generates five new questions.

It's about time we acknowledged that these questions matter practically, not merely academically. Criminal justice systems operate as though individuals **were fully autonomous** agents capable of genuine choice. Sentencing decisions are made as **if** the concept of moral responsibility **were** philosophically unproblematic. **I wish** policymakers **would engage** with the philosophy more seriously. It would make for both better justice and better policy.

2. What have some neuroscience experiments shown about decision-making?

3. How do compatibilists reframe the free will debate?

4. Find one 'as if / as though' with Past Simple and one with Past Perfect in the text. Explain what each expresses.

Sıfat-fiil (participle) ve mutlak (absolute) yapılar

Participle yapıları, iki cümleyi bağlaç kullanmadan birleştirip metni daha akıcı ve yoğun hâle getirir: *She opened the letter and read it slowly.* → *Opening the letter, she read it slowly.* **V-ing** etken, **V3** edilgen, **Having + V3** önce tamamlanmış eylem anlamı verir. Kural: yapının öznesi, ana cümlelerin öznesiyle **aynı** olmalıdır. Farklı bir özne gerekiyorsa *absolute phrase* kullanılır.

Özet tablo

Yapı / Kural	Form	Anlam	Örnek
Active participial V-ing	V-ing phrase at start/end = same subject as main clause	Aynı özne + eş zamanlı veya hemen önceki eylem	<i>Walking through the forest, SHE heard a sound. (= she was walking AND heard) / He left, slamming the door.</i>
Passive participial V3	Past participle phrase = passive meaning, same subject	Aynı özne + pasif anlam (edilgen)	<i>Found guilty, HE was sentenced to five years. / Exhausted by the journey, SHE fell asleep immediately.</i>
Perfect participial Having + V3	Having + V3 = completed BEFORE main verb	Önce yapılan eylem — aynı özne	<i>Having finished the report, SHE went home. / Having studied abroad, HE returned with new perspectives.</i>
Absolute phrase With + N + V-ing	With + noun + V-ing/V3 = accompanying circumstance (DIFFERENT subject possible)	Farklı özne mümkün — eşlik eden durum	<i>With the sun setting, we headed back. / With her eyes closed, she listened carefully.</i>

⚠️ ⚠️ Participial phrase'de özne ANA CÜMLE ile AYNI olmalı! ❌ 'Walking through the park, a dog barked.' (dog yürümedi!) ✅ 'Walking through the park, I heard a dog bark.' | 'Having + V3' = önceden tamamlanan. | 'With + noun + V-ing' = farklı özne olabilir.

The Return of the Wild

Driven to extinction in Britain for centuries, the wolf has not roamed freely in the Scottish Highlands for hundreds of years. Yet rewilding movements — **having gained** remarkable momentum across Europe in recent decades — are now challenging this absence in ways that were unimaginable just twenty years ago.

Having studied the ecological effects of the wolves reintroduced to Yellowstone National Park in 1995–96, researchers described one of the most astonishing chain reactions in conservation history: what ecologists call a "trophic cascade." **With elk populations controlled by predation**, overgrazing declined in some areas. **With willows**

and aspens returning along some riverbanks, birds and beavers came back. However, other ecologists who have examined the same data argue that the size of this effect has been overstated: bears, human hunters and drought also changed the ecosystem.

Faced with this evidence, conservation bodies across Europe are reconsidering assumptions that have remained unchallenged for generations. The debate is no longer purely ecological — it is deeply cultural, political, and philosophical.

Walking through a genuinely rewilded landscape, visitors describe something they struggle to articulate — an encounter with what the Romantics called the sublime: a beauty so vast and indifferent that it is almost frightening.

Sensing something ancient and unhurried, many report feeling the weight of their ordinary concerns dissolve.

Having lost so much of the world's wildness in barely two centuries — driven by the combined forces of agriculture, industry, and urban expansion — we may, at last, be beginning to understand what we have lost. And having understood, perhaps, what we must do next.

Karmaşık isim öbekleri: isimden sonra gelen niteleyiciler

Türkçe'de niteleyici ismin **önüne** gelir (*müzik tarafından tetiklenen anılar*). İngilizce'de uzun niteleyiciler ismin **arkasına** gelir: *memories triggered by music*. Bunlar aslında kısaltılmış relative clause'lardır: *the woman (who is) sitting by the window*. Akademik metinlerde bu yapı bilgiyi özlü biçimde paketlemenin temel yoludur.

Özet tablo

Yapı / Kural	Form	Anlam	Örnek
Noun + V-ing phrase	Noun + V-ing = active post-modifier (doer of action)	İsimden SONRA gelen V-ing = aktif niteleme	<i>The researcher WORKING on memory... / A sound TRIGGERING involuntary memory...</i>
Noun + V3 phrase	Noun + V3 = passive post-modifier (receives action)	İsimden SONRA gelen V3 = pasif niteleme	<i>The memories STORED in music... / Evidence GATHERED by the team...</i>
Noun + to-infinitive	Noun + to + V1 = purpose/potential/following meaning	Amaç veya potansiyel — sıfat gibi	<i>The ability TO recall names / An opportunity TO extend the study / A tendency TO forget...</i>
Noun + that-clause	Noun + that + clause = content clause (abstract nouns)	Fikir, gerçek, sonuç isimleri sonrası	<i>The fact THAT music bypasses dementia / The claim THAT AI will replace musicians / The evidence THAT...</i>

⚠️ ⚠️ Post-modification = isimden SONRA gelen niteleme. Pre-modification = isimden ÖNCE. 'A TRIGGERING sound' (pre) vs 'a sound TRIGGERING memories' (post — longer, more complex). | Common abstract nouns + that-clause: fact, claim, theory, evidence, idea, possibility, belief, suggestion.

geliştirdiğine dair artan kanıtlar var.

IMPORTANT — that-clause ≠ relative clause

the fact **that** he lied → that gerçeğin içeriğini verir (atılamaz, which olamaz).

the story **that** he told → relative clause (which olabilir, nesne olduğu için atılabilir).

COMMON MISTAKE — V-ing ile V3'ü karıştırmak

✗ the songs choosing for the study → ✓ the songs **chosen** for the study (şarkılar seçmez, seçilir

The Proustian Effect

A piece of music heard in childhood can activate memories **that had seemed permanently lost**. This phenomenon — the ability **of sound to reach** into the neural architecture of the past — has become one of the most studied and most debated areas in cognitive neuroscience.

Patients **suffering from advanced Alzheimer's disease**, their verbal communication almost entirely gone, have been observed responding to music **stored in what researchers call procedural and emotional memory**. The pathways **used**

to access this music appear largely unaffected by the disease — offering a remarkable window into the mystery of identity.

The fact that music can access neural pathways largely untouched by dementia is extraordinary. Researchers working in this field — neurologists, psychologists, and music therapists — speak of "involuntary memory": the experience of being suddenly transported, without warning or will, by a sound carrying emotional information laid down decades earlier.

The claim that music could serve as a therapeutic tool for dementia patients is now widely supported by evidence gathered in dozens of clinical settings. The desire to harness this effect therapeutically has driven significant research investment.

Music, it seems, speaks to a part of the self that language and conscious memory cannot reach. The question occupying researchers today is not merely whether this is true, but how — and the possibility that the answer lies in the deepest structures of human identity is one few scientists are comfortable dismissing.

Writing — örnek cevaplar

Görev 1 — Post-modification alıştırması

The students suffering from exam anxiety often struggle to recall information they know well. Researchers working in this field have made significant recent breakthroughs. The claim that music can access neural pathways unaffected by dementia has changed how we treat Alzheimer's patients. The question occupying neuroscientists today is why music memory seems to be encoded differently.

Görev 2 — Müzik ve bellek

Music is a phenomenon occupying a unique place in human experience. The neural pathways activated by a familiar song are pathways untouched by many neurological conditions. The claim that music can restore identity — even briefly — in patients suffering from severe memory loss is a claim supported by growing evidence. What remains to be understood is the mechanism underlying this extraordinary effect.

The Crisis of Democratic Institutions

Compelling though the case for rapid democratic reform may be, the mechanisms of institutional change are notoriously slow — by design. **Much as we may wish** for swift transformation, democratic systems are intentionally resistant to sudden change. This is, simultaneously, their greatest strength and their most frequently criticised limitation.

Notwithstanding the recent erosion of trust in democratic institutions, surveys consistently show that most citizens in liberal democracies still prefer their system to any available alternative. **For all its inefficiencies**, the rule of law represents something genuinely worth defending — not because it is perfect, but because the alternatives are measurably worse.

Be that as it may, complacency is not an option. The threats to democratic governance today come not only from authoritarian states or foreign interference, but from within — from elected leaders who exploit legal loopholes to

undermine the very institutions they were chosen to lead.

Important though the formal structures of democracy undoubtedly are, they are insufficient without an engaged citizenry. **Admirable though the constitution** of any democracy may be, it is only as strong as the collective will to defend it.

Notwithstanding the pessimism that characterises much contemporary political commentary, the historical record suggests grounds for cautious optimism. Democracies have faced crises before and, more often than not, have emerged with their core institutions strengthened rather than weakened. **Much as** the current moment may feel uniquely precarious, we should be careful not to confuse difficulty with inevitability.

Comprehension

1. It is by design — their greatest strength (stability, rule of law) is also their most criticised limitation (slowness to reform).
2. Threats from within — elected leaders who exploit legal loopholes to undermine the institutions they lead.
3. e.g. 'Compelling though the case for rapid reform may be...' / 'Much as we may wish for swift transformation...' / 'Notwithstanding the recent erosion of trust...' / 'For all its inefficiencies...' / 'Be that as it may'
4. The historical record shows democracies have faced crises before and often emerged with institutions strengthened, not weakened.

Grammar practice

1. Tired ____ he was, he finished the marathon. → **as / though**
2. For ____ his experience, he made a basic mistake. → **all**
3. ____ the bad weather, the ceremony went ahead. (çok resmi) → **Notwithstanding**
4. Try as she ____ , she couldn't open the door. → **might**

Writing — örnek cevaplar

Görev 1 — Gelişmiş concession

Compelling though the case for rapid democratic reform may be, stability must not be sacrificed in its pursuit. Much as we may wish for swift institutional change, history shows that hasty transitions often lead to chaos. Notwithstanding the very real failures of current democratic systems, they remain the most accountable form of governance ever devised. For all its inefficiencies, democracy protects fundamental rights that authoritarian alternatives do not.

Görev 2 — Karşı argüman

For all its imperfections, democracy remains preferable to the alternatives. Compelling though authoritarian efficiency may appear in the short term, it consistently fails its citizens over time. Much as I recognise the frustrations of slow democratic processes, I believe patience is necessary. Notwithstanding recent setbacks, the historical trend towards greater freedom is undeniable. Be that as it may, complacency is dangerous — democracies require active citizens to survive.

C1 yapılarının sentezi

Bu ünite yeni bir kural öğretmez; C1 boyunca gördüğün yapıları **bir arada ve doğal biçimde** kullanmayı hedefler. Amaç her cümleye bir "zor yapı" sıkıştırmak değil, her yapıyı **işlevine göre** seçmektir: vurgu için inversion, arka plan bilgisi için participle, denge için concession, karmaşık fikirler için nominal clause.

Özet tablo

Yapı / Kural	Form	Anlam	Örnek
C1 Synthesis 1	Inversion: Never have I... / Rarely does... / No sooner had...	Dramatik vurgu için negatif ön yükleme	<i>Never have I regretted a conscious, well-considered choice.</i>
C1 Synthesis 2	Nominal clauses: What constitutes... / The fact that... / Whether... or not	Özne ve nesne olarak karmaşık isim cümlecikleri	<i>What constitutes a good life is the oldest philosophical question.</i>
C1 Synthesis 3	Participial phrases: Having reflected... / Driven by... / Weighing the evidence...	Özlü ve sofistike ek bilgi	<i>Having spent decades studying regret, researchers found consistent patterns.</i>
C1 Synthesis 4	Advanced concession: Compelling though... / Much as... / Notwithstanding... / For all...	Nüanslı, dengeli argüman yapısı	<i>Compelling though the case for ambition is, balance matters more.</i>

Bu ünite tüm C1 yapılarını pekiştirmek için tasarlanmıştır. Her yazı görevinde cesaret edin: farklı yapıları birleştirin. Aynı yapıyı tekrar tekrar kullanmaktan kaçının.

Örneklerle

Hangi amaçla hangi yapı?

Vurgu: **Rarely do we** stop to ask what we really want. → *Ne istediğimizi sormak için nadiren dururuz.*

Arka plan: **Having worked** abroad for years, she returned home. → *Yıllarca yurt dışında çalıştıktan sonra eve döndü.*

Denge: **Much as** I value ambition, I value rest more. → *Hırsla ne kadar değer versem de dinlenmeye daha çok veririm.*

Konu: **What matters most** is how we treat others. → *En önemli olan, başkalarına nasıl davrandığımızdır.*

Basit → C1

I didn't realise how important it was until later.

What Is a Life Well Lived?

What constitutes a life well-lived is perhaps the oldest question in philosophy — and, **arguably**, the one we are least equipped to answer in the age of social media and curated identity.

Never has the pressure to perform a successful life been greater, yet **rarely has** the gap between performance and genuine satisfaction been wider. **Much as we may know**, intellectually, that the images we consume on social platforms represent filtered fictions, this knowledge does not neutralise their emotional impact.

Having spent several years caring for dying patients, Australian palliative-care worker Bronnie Ware wrote about a striking pattern in her 2011 book: the regrets she heard were remarkably consistent. **Notably**, they were not about failures of ambition — jobs not taken, risks not run. They were, **strikingly**, failures of authenticity and connection: not having lived more truthfully, not having expressed feelings, not having maintained friendships.

Compelling though the case for ambition and achievement may be, her observations — personal rather than scientific — suggest that **what we leave unlived** may matter as much as what we accomplish. **Notwithstanding** the risks of excessive introspection, there is a distinction — **the fact that** this distinction is rarely articulated does not make it less real — between rumination and genuine reflection that leads to change.

Whatever time remains, the question worth asking is not "What did I accomplish?" but "Did I live in accordance with what I actually value?" **Whether** we have the courage to answer honestly, and to act on the answer — **that is** **what determines** the character of a life.

1. Tam sentez — zorunlu

Write a paragraph of 150–200 words on what constitutes a life well-lived. You MUST use at least 6 different C1 structures:

- Inversion (Never/Rarely...)
- Nominal clause (What...)
- Participial phrase (Having.../V3...)
- Advanced concession (Compelling though.../Much as...)
- Formal conditional (Had... / Were... to)
- Stance adverbial (Arguably/Notably/Strikingly)

2. Kişisel yansıma

Write your own 'list of regrets I am committed to not having' — things you don't want to look back on with regret. Use advanced C1 grammar throughout.

Exercises

1. **b) What** — Nominal clause as subject: *What + clause + IS* (tekil fiil)

2. **a) has there been** — Inversion after 'Never': *Never + has + subject + V3*

3. **a) Having realised** — Perfect participial: *Having + V3 = önce fark etti, sonra karar verdi*

4. **b) as** — *Much as + clause = literary concession (ne kadar...olsa da)*

5. **c) that** — Abstract noun (fact) + *that-clause = nominal clause*

6. **c) Compelling** — *Adj + though + subject + verb (concessive fronting)*

7. **c) Whatever** — *Whatever + clause = ne olursa olsun (concessive)*

8. **c) Had** — Formal 3rd conditional: *Had + subject + V3*

9. **a) Notwithstanding** — *Notwithstanding + noun phrase = formal 'despite'*

10. **c) What** — *What-clause as subject = the things she said*

11. **a) For all** — *For all + noun phrase = tüm başarılarına rağmen*

12. **b) reflected** — *Having + V3 = perfect participial (önce düşündü, sonra huzura erdi)*

13. **c) How** — *How-clause as subject = the way in which we define it*

14. **a) do we find** — Inversion after 'Rarely': *Rarely + do + subject + V1 (present)*

15. **c) Whatever** — *Whatever + noun clause = hangi fırsatlar olursa olsun*

Comprehension

1. The regrets were about failures of authenticity and connection — not living truthfully, not expressing feelings, not maintaining friendships — not failures of ambition.

2. The things we didn't do, the authentic self we didn't express — possibly as important as our achievements.

3. Inversion: 'Never has the pressure been greater' / Nominal: 'What constitutes a life well-lived' / Participial: 'Having spent decades studying' / Concessive: 'Compelling though the case for ambition may be'

4. e.g. 'Arguably' (debatable but probable) / 'Notably' (drawing attention to surprising finding) / 'Strikingly' (emphatically notable)

Grammar practice

1. Rarely ____ I seen such dedication. (inversion) → **have**

2. ____ spent years abroad, she spoke three languages. (participle) → **Having**

3. ____ matters most is honesty. (nominal clause) → **What**

4. Much ____ I admire him, I disagree with him. (concession) → **as**

Writing — örnek cevaplar

Görev 1 — Tam sentez — zorunlu

Arguably, the greatest regret of a life well-lived is not failure, but inauthenticity. What constitutes a meaningful life is a question that has occupied philosophers for millennia. Strikingly, the research consistently shows that connection and honesty — not achievement — define what people value at the end. Notably, Bronnie Ware's research transformed how many people think about priorities.

Compelling though the case for ambition may be, what matters most is whether we lived according to our own values. Having spent decades observing end-of-life regrets, Ware found that professional achievements were rarely mentioned. Never has this evidence been more important than in our achievement-obsessed culture. Were we to take this research seriously, our choices — about work, relationships, and time — would look radically different. What we leave unlived may be as significant as what we accomplish.

Görev 2 — Kişisel yansıma

I am committed to not regretting the conversations I didn't have. What matters most to me is that the people I love know it. Never will I look back and wish I had spent more time at my desk. Arguably, presence is the most valuable

thing we can give another person. Had I understood this earlier, I would have put down my phone at dinner years ago.

3 Reading · Okuma**Letter to the Future**

What we bequeath to the future is, ultimately, a reflection of what we are. **Never has** the relationship between the present generation and those who will follow been more consequential — or more morally urgent.

Having acquired an unprecedented capacity to alter the fundamental systems of the biosphere, we have simultaneously acquired an unprecedented moral responsibility that most of our political and economic institutions are ill-equipped to discharge.

Compelling though the case for short-term self-interest may be — and **notwithstanding** the very real and legitimate pressures that billions of people face in meeting immediate needs — the evidence of long-term risk is no longer seriously in doubt. **Much as we may resist** the idea that we bear moral responsibility for people who do not yet exist, the logic of intergenerational ethics is difficult, on reflection, to escape.

Were we to take seriously the interests of all future people — to genuinely expand our moral circle across time as well as space — the way we organised our economies, our energy systems, and our political institutions **would look** radically different from today.

Had we understood this clearly fifty years ago, we would not be facing the specific convergence of crises that now confronts us. **Whether** that understanding, now more widely shared than at any previous moment, **will translate into action** in time — **that, arguably**, is the defining question of our era.

Whatever choices remain available to us — and there are still significant ones — the question is whether we will make them. **Admittedly difficult. Arguably** the most important set of decisions humanity has collectively faced. And

still, somehow, open.

Never before has the relationship between truth and media been more contested. No sooner did social media platforms achieve global reach than they became vehicles for disinformation. Not only do algorithms amplify false content, but they actively reward engagement over accuracy. Seldom have ordinary citizens faced such sophisticated manipulation. Hardly ever has a technology posed such risks to democratic society — and yet, rarely has the need for critical thinking been greater.
