

Complete Theme

Vocabulary — 18 words

Word	IPA	Turkish	Example
natural resource <i>noun</i>	/ˈnætʃrəl rɪˈsɔːs/	doğal kaynak	Water and forests are important natural resources for every country.
fossil fuel <i>noun</i>	/ˈfɒsl fjuːəl/	fosil yakıt	Cars and factories still use a lot of fossil fuel every day.
renewable energy <i>noun</i>	/rɪˈnjuːəbl ˈenədʒi/	yenilenebilir enerji	More cities are switching to renewable energy like solar and wind power.
deforestation <i>noun</i>	/ˌdiːˌfɒrɪˈsteɪʃn/	ormansızlaşma	Deforestation destroys the homes of thousands of animal species.
pollution <i>noun</i>	/pəˈluːʃn/	kirlilik	Pollution from factories has damaged the river for years.
sustainable <i>adjective</i>	/səˈsteɪnəbl/	sürdürülebilir	Farmers are learning more sustainable ways to grow food.
habitat <i>noun</i>	/ˈhæbɪtæt/	yaşam alanı, habitat	The forest is the natural habitat of hundreds of bird species.
endangered species <i>noun</i>	/ɪnˈdeɪndʒəd ˈspiːʃiːz/	nesli tükenmekte olan tür	The mountain gorilla is an endangered species that needs urgent protection.
extinct <i>adjective</i>	/ɪkˈstɪŋkt/	nesli tükenmiş	Scientists say hundreds of species could become extinct in the next century.
wildlife <i>noun</i>	/ˈwaɪldlaɪf/	yaban hayatı	The national park protects wildlife such as bears, wolves, and eagles.
ecosystem <i>noun</i>	/ˈiːkəʊsɪstəm/	ekosistem	A coral reef is a delicate ecosystem that supports thousands of fish.
migrate <i>verb</i>	/maɪˈɡreɪt/	göç etmek	Many birds migrate south every winter to find warmer weather.
conservation <i>noun</i>	/ˌkɒnsəˈveɪʃn/	koruma	The conservation project has helped the tiger population grow again.
environmentalist <i>noun</i>	/ɪnˌvaɪrən ˈmentəlist/	çevreci	The environmentalist gave a talk about protecting our local river.
raise awareness <i>phrase</i>	/reɪz əˈweənəs/	farkındalık yaratmak	The school organised a poster campaign to raise awareness about pollution.

Word	IPA	Turkish	Example
AbOnlinEnglish Upper Secondary — Lise Hazırlık — Complete Theme · Orijinal içerik, TYMM müfredatıyla uyumlu.			
wildlife reserve <i>noun</i>	/ˈwaɪldlaɪf ˈrɪːzɜːv/	doğal yaşam koruma alanı	Rangers work every day to protect the animals in the wildlife reserve.
ban <i>verb</i>	/bæn/	yasaklamak	The government decided to ban plastic bags to reduce pollution.
recycle <i>verb</i>	/ˌriːˈsaɪkl/	geri dönüştürmek	Our class started a project to recycle paper and plastic at school.

Past Perfect Progressive: an action in progress before another past action

We use the Past Perfect Progressive (had been + verb-ing) for an action that was in progress for some time before another action or moment in the past. It highlights the duration and continuity of the earlier action.

Past Perfect Progressive (had been + fiil-ing), geçmişte başka bir geçmiş olaydan önce belirli bir süre devam eden bir eylemi anlatır. Eylemin süresini ve devamlılığını vurgular.

When? We use it to say how long an environmental problem, or a conservation effort, had been going on before another past event.

Bir çevresel sorunun ya da bir koruma çalışmasının, başka bir geçmiş olaydan önce ne kadar süredir devam ettiğini anlatırken kullanılır.

Positive

- Factories had been polluting the river for years.
- We had been recycling for six months before the school project started.

Negative

- The river hadn't been carrying clean water for months.
- They hadn't been protecting the habitat before the new law.

Question

- How long had the volunteers been planting trees?
- Had the animals been migrating there for a long time?

Short answers

- Yes, they had. / No, they hadn't.
- Yes, it had. / No, it hadn't.

Common mistakes

- ~~Factories had polluting the river for years.~~ → **Factories had been polluting the river for years.**
- ~~How long had been the volunteers planting trees?~~ → **How long had the volunteers been planting trees?**

1. Before the new law, factories _____ the river for years.

- a. had been polluting
- b. have polluted
- c. were polluting

2. Scientists _____ the reef for a decade when they found the damage.

- a. study
- b. had been studying
- c. have studied

3. _____ long had the volunteers been planting trees?

- a. How
- b. What
- c. Since

4. The elephants _____ (migrate) to that area every winter until their habitat disappeared.

5. The river _____ (not / carry) clean water for months before people noticed.

6. _____ (hunters / kill) too many animals before the ban started?

AbOnlinEnglish Upper Secondary — Lise Hazırlık — Complete Theme · Orijinal içerik, TYMM müfredatıyla uyumlu.

7. Scientists had studying the reef for a decade. — *True / False*

8. The volunteers had been planting trees for two years before the forest recovered. — *True / False*

9. A: How long _____ the company _____ (pollute) the river before the fine?

10. B: It _____ (pollute) it for almost ten years — nobody had stopped them.

11. Make a question about a conservation project.

Third Conditional: unreal past situations and their results

We use the Third Conditional (If + Past Perfect, ... would have + past participle) to talk about an unreal, imagined situation in the past and its imagined result — the opposite of what really happened.

Third Conditional, geçmişte gerçekleşmemiş, hayalî bir durumu ve onun (yine geçmişte kalan) hayalî sonucunu anlatır: If + Past Perfect, ... would have + V3.

When? We use it to discuss the consequences of environmental action that was, or wasn't, taken in the past.

Geçmişte alınmayan bir çevresel önlemin sonuçlarını, ya da alınan bir önlemin neyi engellediğini tartışırken kullanılır.

Positive

- If we had protected the river earlier, the fish population would have survived.
- The forest would have recovered if people had stopped cutting trees.

Negative

- If people hadn't cut down so many trees, the animals wouldn't have lost their habitat.
- The species wouldn't have become extinct if hunters hadn't hunted it.

Question

- What would have happened if we hadn't protected the reserve?
- Would the river have stayed clean if the factory hadn't polluted it?

Short answers

- Yes, it would. / No, it wouldn't have.
- Yes, they would have. / No, they wouldn't.

Common mistakes

- ~~If people didn't cut down so many trees, the animals wouldn't have lost their habitat.~~ → **If people hadn't cut down so many trees, the animals wouldn't have lost their habitat.**
- ~~The tigers would survive if hunters hadn't killed so many of them.~~ → **The tigers would have survived if hunters hadn't killed so many of them.**

1. If people _____ so many trees, the animals wouldn't have lost their habitat.

- a. didn't cut down
- b. hadn't cut down
- c. don't cut down

2. The tigers _____ if hunters hadn't killed so many of them.

- a. would survive
- b. would have survived
- c. survived

3. If we had protected the river earlier, the fish population _____.

- a. wouldn't disappear
- b. wouldn't have disappeared
- c. didn't disappear

4. If scientists _____ (not warn) us, more species would have become extinct.

5. The water _____ (stay) clean if the factory hadn't released chemicals into the lake.

6. If the government _____ (ban) plastic bags earlier, there would have been less pollution.

7. If we hadn't protected the reserve, more animals would disappear. — *True / False*

8. If hunters hadn't killed so many tigers, the tigers would have survived. — *True / False*

9. A: What _____ (happen) if nobody had protected this forest?

10. B: If nobody _____ (protect) it, it _____ (disappear) years ago.

11. People cut down the forest. The animals lost their habitat. (*Join the ideas with a Third Conditional sentence.*)

The Forest That Had Been Disappearing

Before you read

- Look at the title. What do you think had been happening to the forest?
- Guess: what are two reasons a rainforest might disappear?

For hundreds of years, a huge rainforest had been growing quietly in South America, home to millions of species of plants and animals. But in the last fifty years, large areas had been cut down for farming and wood before governments and scientists finally took real action.

By the early 2000s, companies had been cutting down trees so quickly that scientists warned an area the size of a small country was disappearing every year. Local communities, who had been living in the forest for generations, lost their homes and their traditional way of life.

Then environmental groups started a new project. They had been working with local farmers for two years when a new law banned illegal logging in the most important areas. Farmers received support to grow crops without destroying more trees.

Today, the deforestation rate in that region is much lower than it was twenty years ago. Scientists say that if people hadn't acted when they did, thousands more species would have lost their habitat forever.

The story of this rainforest shows that natural resources can recover — but only if people protect them before it is too late.

1. What is the text mainly about?
 - a. A forest region that reduced its deforestation rate after action was taken
 - b. A new law about farming machines
 - c. A list of animal species in South America
2. Who lost their homes and traditional way of life?
 - a. Scientists
 - b. Local communities
 - c. Environmental groups
3. What had companies been doing by the early 2000s?
 - a. Planting new trees
 - b. Cutting down trees very quickly
 - c. Studying local animals
4. What did the new law do?
 - a. It banned illegal logging in important areas
 - b. It closed all farms in the region
 - c. It stopped tourism in the forest
5. The deforestation rate today is higher than it was twenty years ago. — *True / False*

6. What does the text suggest about natural resources?

- AbOnlinEnglish Upper Secondary — Lise Hazırlık — Complete Theme · Orijinal içerik, TYMM müfredatıyla uyumlu.
- a. They always disappear completely once damaged
 - b. They can recover if people protect them in time
 - c. They are not important for local communities

After you read

- What natural resources are important in your own country? Name two.
- Do you think laws are the best way to protect forests? Why or why not?

Saving the Sea Turtles

Before you read

- Look at the title and think: why might sea turtles be in danger?
- Guess: what could ordinary people do to help protect them?

Selin is a marine biology student who spends her summers on a small research project on the coast. Before she joined, volunteers had been counting sea turtle nests for three years, and the numbers were falling fast.

Sea turtles are an endangered species because of pollution, fishing nets, and the loss of safe beaches for laying eggs. If people hadn't started protecting the nesting beaches, many more turtles would have died before reaching the sea.

Every night in the summer, Selin and the other volunteers had been walking along the beach, looking for new nests. When they find one, they mark it and protect it from dogs, birds, and careless visitors.

The project also works with local hotels. If a hotel hadn't agreed to turn off its beach lights at night, the baby turtles would have walked towards the lights instead of the sea, because they naturally follow the brightest light.

Thanks to this teamwork, the number of nests on the beach has almost doubled in five years. Selin says the project shows that ordinary people can protect wildlife if they take action together.

1. What is the text mainly about?

- a. A student project that protects sea turtle nests on a beach
- b. A new law about fishing nets
- c. A holiday Selin took on the coast

2. Why are sea turtles an endangered species, according to the text?

- a. Because of pollution, fishing nets, and the loss of nesting beaches
- b. Because tourists like to watch them
- c. Because they migrate too far

3. What do the volunteers do at night in the summer?

- a. They walk along the beach looking for new nests
- b. They clean the hotel beach
- c. They study fish in the sea

4. Why do hotels turn off their beach lights at night?

AbOnlineEnglish Upper Secondary — Lise Hazırlık — Complete Theme · Orijinal içerik, TYMM müfredatıyla uyumlu.

- a. Because guests complain about the light
- b. Because baby turtles naturally follow the brightest light and could walk the wrong way
- c. Because it saves the hotel money

5. The number of turtle nests on the beach has gone down in the last five years. — *True / False*

6. What does the text suggest about protecting wildlife?

- a. Only scientists can protect endangered animals
- b. Ordinary people can protect wildlife if they work together
- c. Hotels are usually against conservation projects

After you read

- Have you ever seen or read about an endangered animal in your country? Which one?
- Write two sentences about what you would do to help protect an endangered species.

Beach Clean-up Volunteers

Before you listen

- You will hear two volunteers talking during a beach clean-up.
- Guess: what kind of rubbish do you think they find on a beach?

1. What are Emre and Zara doing?

- a. Cleaning up rubbish on a beach
- b. Fishing on a beach
- c. Building a new beach path

2. According to Zara, what had local families been doing at the beach for years?

- a. Cleaning the beach
- b. Having picnics
- c. Studying sea animals

3. What does Emre find that could trap animals?

- a. A plastic bottle
- b. An old fishing net
- c. A broken chair

4. Emre thinks the fishing net was not dangerous for sea animals. — *True / False*

5. How many bags have they filled so far?

- a. Four
- b. Six
- c. Ten

Planning an Endangered Species Project

Before you listen

- You will hear two students planning a class project about an endangered animal.
- Predict: what information does a good project about an animal usually include?

1. Which animal do Aslı and Kerem choose for their project?

- a. The Anatolian leopard
- b. The mountain gorilla
- c. A sea turtle

2. What had scientists been doing before they found evidence?

- a. Feeding the animal in a zoo
- b. Searching for proof that it still existed
- c. Writing a book about forests

3. What will Aslı research?

- a. The habitat and the threats
- b. The conservation projects only
- c. The history of the school

4. What do they want to do in the presentation?

- a. Show a film
- b. Role-play as environmentalists
- c. Sing a song

5. Kerem thinks they don't need a poster for their project. — *True / False*

If We Hadn't Protected It...

Pairs · 10-12 dk

With a partner, discuss what would have happened to different natural resources or animals if people had not taken action to protect them. Use the Third Conditional.

Useful language: If people hadn't protected ..., ... would have ..., If we hadn't banned ..., ..., What do you think would have happened if ...?, I think ... would have disappeared / survived.

1. Look at four picture cards: a forest, a river, an endangered animal, a coral reef.
2. With your partner, discuss what might have happened to each one without protection.
3. Make at least four sentences with the Third Conditional (if + hadn't/had, would have).
4. Listen to your partner's sentences and ask one follow-up question each.
5. Share your favourite sentence with the class.

Conservationist Interview

Pairs · 10 dk

Role-play an interview between a journalist and a conservationist about an environmental project. This helps you prepare for your performance task.

Useful language: What had you been doing before this project started?, Why is this habitat / species important?, What would have happened if you hadn't acted?, In my opinion, ...

1. Decide who is the journalist and who is the conservationist.
2. The conservationist chooses a project (protecting a forest, an animal, a river, etc.).
3. The journalist prepares four questions using this theme's grammar and vocabulary.
4. Act out the interview.
5. Swap roles and interview about a different project.

Writing

An Environmental Problem and Solutions

80-100 words

Write a short report about an environmental problem (for example deforestation, pollution, or an endangered species) and suggest two solutions. This will help you prepare for your performance task project.

Plan:

1. Choose one environmental problem to focus on.
2. Note 2-3 facts about the problem (use the Third Conditional or Past Perfect Progressive if useful).
3. Write two clear solutions or actions people could take.
4. Check your grammar and vocabulary before finishing.

Checklist:

- ☐ I described one clear environmental problem.
- ☐ I suggested at least two solutions.
- ☐ I used at least three target words from Vocabulary.
- ☐ I checked my spelling and punctuation.

A Proposal for a Conservation Project

90-110 words

Write a short proposal for a class project that protects natural resources or an endangered animal — this is a first draft for your performance task. Explain the problem, what your project will do, and why it matters.

Plan:

1. Choose a natural resource or animal to focus your project on.
2. Explain the threat it faces in 1-2 sentences.
3. Describe what your project will do, step by step.
4. Add one sentence about the result you hope for.

Checklist:

- ☐ I explained the environmental problem clearly.
- ☐ I described at least two project steps.
- ☐ I used at least three target words from Vocabulary.
- ☐ I used at least one grammar point from this theme.

1. Choose the correct meaning: 'endangered species'
 - a. an animal that migrates every year
 - b. a type of animal or plant at risk of disappearing forever
 - c. a place where animals live
2. What does 'deforestation' mean?
 - a. cutting down large areas of forest
 - b. planting new trees
 - c. protecting an ecosystem
3. What does it mean to 'raise awareness' about a problem?
 - a. to solve the problem completely
 - b. to help more people understand and notice the problem
 - c. to ignore the problem
4. Scientists _____ the reef for a decade when they found the damage.
 - a. study
 - b. had been studying
 - c. have studied
5. The elephants _____ (migrate) to that area every winter until their habitat disappeared.
6. If people _____ so many trees, the animals wouldn't have lost their habitat.
 - a. didn't cut down
 - b. hadn't cut down
 - c. don't cut down
7. The tigers _____ (survive) if hunters hadn't killed so many of them.
8. In 'The Forest That Had Been Disappearing', what did the new law do?
 - a. It banned illegal logging in the most important areas
 - b. It closed all the local farms
 - c. It stopped tourists visiting the forest
9. In 'Saving the Sea Turtles', the number of nests on the beach has gone down in five years. — *True / False*
10. In 'Saving the Sea Turtles', why do hotels turn off their beach lights at night?
 - a. To save money
 - b. Because baby turtles follow the brightest light
 - c. Because guests are asleep

Support

1. Match 8 vocabulary words from this theme to their Turkish meanings.
2. Copy out the example sentences for 6 target words.
3. Complete 5 gap-fill sentences using the word bank from class.
4. Read the theme's reading text again and underline 5 new words.

Core

1. Write 6 original sentences using words from this theme's vocabulary (natural resource, fossil fuel, renewable energy...).
2. Write 5 sentences using Past Perfect Progressive: an action in progress before another past action.
3. Answer the reading comprehension questions again from memory.
4. Record yourself saying the Speaking task's useful language phrases.

Extension

1. Write a short paragraph (80-100 words) combining at least 6 target words and Past Perfect Progressive: an action in progress before another past action.
2. Prepare 3 extra questions about the theme's topic to ask a classmate.
3. Rewrite two 'Common mistakes' sentences correctly and explain why.
4. Create your own 3-question quiz on this theme's grammar for a partner.

A · Vocabulary

1. Water and forests are examples of _____.
 - a. fossil fuels
 - b. natural resources
 - c. ecosystems
2. Energy from the sun and wind is called _____.
 - a. renewable energy
 - b. pollution
 - c. conservation
3. The mountain gorilla is an _____ that needs urgent protection. (nesli tükenmekte olan tür)
4. A place where wild animals are protected is called a _____.
 - a. wildlife reserve
 - b. canteen
 - c. habitat only
5. Turning old paper or plastic into something new is called _____.
 - a. recycling
 - b. migrating
 - c. banning

B · Grammar

1. Before the new law, factories _____ the river for years.
 - a. had been polluting
 - b. have polluted
 - c. were polluting
2. How long _____ the volunteers been planting trees?
 - a. had
 - b. have
 - c. did
3. If we _____ the river earlier, the fish population wouldn't have disappeared.
 - a. protected
 - b. had protected
 - c. protect

4. The tigers would have survived if hunters _____ so many of them.

- a. didn't kill
- b. hadn't killed
- c. don't kill

5. Scientists _____ (study) the reef for a decade when they found the damage.

6. People cut down the forest. The animals lost their habitat. (*Join the ideas with a Third Conditional sentence.*)

C • Reading

1. According to 'The Forest That Had Been Disappearing', who lost their homes and way of life?

- a. Scientists
- b. Local communities
- c. Tourists

2. In 'Saving the Sea Turtles', why are sea turtles endangered?

- a. Pollution, fishing nets, and the loss of nesting beaches
- b. Too much rain
- c. Too many tourists taking photos

3. In 'The Forest That Had Been Disappearing', the deforestation rate today is higher than twenty years ago. —
True / False

D • Functional Language / Use of English

1. Ask what would have happened if a reserve hadn't been protected.

2. Ask a conservationist how long they had been working on a project before it succeeded.

3. A: What would have happened if nobody had protected this forest? B: It _____ (disappear) years ago.

E • Guided Writing

1. the government / ban / plastic bags earlier / there / be / less pollution today (*Make a correct Third Conditional sentence.*)

2. volunteers / count / turtle nests / for three years / before Selin joined (*Make a correct sentence with the Past Perfect Progressive.*)
