Mission Control: Design a Space Mission

Groups of 3-4 · 15-18 dk

In groups, design a hypothetical space mission (destination, crew, and goals). Present your plan to the class using the Future Perfect to describe what your mission will have achieved by a certain date.

Useful language: By [year], our crew will have reached ..., We will have completed ... experiments by the end of the mission., How long will the crew have been travelling by the time they arrive?, We won't have solved every problem, but ...

1. In your group, choose a destination (Moon, Mars, an asteroid, or somewhere else).
2. Decide on the crew and their jobs (pilot, scientist, doctor, engineer).
3. Write three goals your mission will have achieved by a specific date.
4. Practise presenting your plan using at least three Future Perfect sentences.
5. Present your mission plan to the class and answer two questions from another group.

Life in 2050: A Class Debate

Whole class, two teams · 15-20 dk

Debate the motion: 'By 2050, technology will have made our lives better, not worse.' One team argues for, the other against, using predictions with the Future Perfect.

Useful language: By 2050, artificial intelligence will have ..., I don't agree — we won't have solved ..., Won't people have lost their jobs by then?, In my opinion, scientists will have made life easier because ...

1. Split into two teams: 'For' and 'Against' the motion.
2. In your team, brainstorm three arguments using the Future Perfect.
3. Choose one speaker to open the debate for each team.
4. Take turns giving arguments and short responses to the other team.
5. Vote as a class on which team gave the most convincing arguments.

Writing

My Space Colony Project Plan

90-120 words

Write a project plan for a hypothetical space colony (on the Moon, Mars, or elsewhere). Describe where it is, who will live there, and what the colony will have achieved by a chosen future date. This is preparation for your performance task.

Plan:

1. Choose your colony's location and give it a name.
2. List who will live there and what their jobs will be.
3. Write at least three goals the colony will have achieved by your chosen date, using the Future Perfect.
4. Add one sentence about the biggest challenge the colony will face.

Checklist:

- ☐ I described the colony's location and residents.
- ☐ I used the Future Perfect at least three times.
- ☐ I used at least three target vocabulary words.
- ☐ I checked my spelling and punctuation.

A Message from the Future

80-100 words

Imagine you are an astronaut or scientist writing a short message back to Earth from the year 2060. Describe what will have changed in space exploration and everyday life by then.

Plan:

1. Decide who you are (astronaut, scientist, or futuristic innovator) and where you are writing from.
2. Choose three changes that will have happened by 2060.
3. Write your message using the Future Perfect and at least one question tag.
4. Read your message aloud to check it sounds natural.

Checklist:

- ☐ I clearly said who is writing and from where.
- ☐ I used the Future Perfect at least twice.
- ☐ I used at least one question tag correctly.
- ☐ My message is between 80 and 100 words.
